

VISVESVARAYA TECHNOLOGICAL UNIVERSITY (VTU) has entered into MoU with INTERNATIONAL INSTITUTE of INDUSTRIAL SAFETY MANAGEMENT (IIISM). The basic Objective of MoU is to offer Post Graduate Diploma in Industrial Safety Management (PGDISM) to the Engineering Graduates.

IIISM is the first college to start Industrial Safety Management course, established in 2009 and it is the First Industrial Safety Management College recognised by Government of Karnataka and other Universities. Already more than thousand students completed and placed in Reputed MNC Companies like Godrej, Rittal, Jubilant, Xerox, 3M, Bosch, TCE, Johnson and Johnson, Gammon India, PunjLloyd, Hiranandani, Rites (Central Govt.), CEC Soma, Galfar (Oman), L&T, Synohydro (Dubai) etc.

Nowadays, Qualified Safety Engineers are much in demand and Well Qualified Professional Safety Engineers are not available both in India and Overseas. To overcome this VTU has recognised IIISM to conduct PGDISM course to students of B.E/B.Tech & M.E/M.Tech.

VISVESVARAYA TECHNOLOGICAL UNIVERSITY, Belgaum entered into Memorandum of Understanding (MoU) with INTERNATIONAL INSTITUTE of INDUSTRIAL SAFETY MANAGEMENT (IIISM).

India consider to be developing country, in that industries are major role in development. Industrial workers and public are always prone to risk arising out of any industrial accident. The cost of accidents can be in the form of loss of life, Economic loss, Loss of reputation, loss of time. Industrial Safety Management has now become an important and inevitable issue for an organization to prevent accidents and Near Miss. The aim of PGDISM is to minimize the possibility of risks, accidents and injuries by the implementation of varied techniques of risk and safety management. PGDSIM helps the candidates to gain the ability to implement varied techniques of risk and safety management which will reduce the harmful impact of industrial revolution.

VTU, one of the prestigious and largest Technological Universities in the country, is in the forefront in offering higher education in engineering and technology relevant to the current and projected needs of the society, besides promoting cooperation between academic and industrial communities.
