

SEMESTER - V

MANAGEMENT AND ENTREPRENEURSHIP IN TEXTILE INDUSTRY [As Per Choice Based Credit System (CBCS) Scheme] SEMESTER - V			
Subject Code	15TX51	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES : The Course aims at updating the knowledge of students in the following fields of management and entrepreneurship. 1. Basic concepts of management, organisation in Textile and garment Industry. 2. Basic concepts to become entrepreneurs.			
MODULES		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Management: Introduction Meaning - nature and characteristics of management, Management and Administration roles of management, levels of management, Functions of management, Role of management in improving work quality Planning: Nature importance and purpose of planning, process types of plans, steps in planning, decision making. Steps in decision making. Planning in Textile and Garment industry		10 Hrs	L1, L2,L3
MODULE 2: Organising and staffing: Nature and purpose of organization principles of organization - Types of organisation, Departmentation, span of control - MBO and MBE, Nature and importance of staffing. Process of selection and recruitment procedure, Concept of team work, smart work and SWOC analysis in Textile industry. Directing and controlling: Meaning and nature of directing. leadership types, Motivation theories, Communication and its importance, Coordination, Meaning and importance and Techniques of coordination. Steps in controlling		10 Hrs	L1,L2, L3

<p>MODULE 3: Entrepreneurship: In Textile and Garment industry: Meaning of entrepreneur, Evolution of the concept, Functions of an entrepreneur, Types of Entrepreneur, In entrepreneur- an emerging class, Concepts of Entrepreneurship, Evolution of Entrepreneurship, stages in entrepreneurial process, different source of finance for an entrepreneur- Central and state level financial Institutions.</p> <p>Micro, Small & medium Enterprises (MSME): Definition Characteristics, Objectives, Scope, role of MSME in Economic Development, Advantages of MSME steps to start an MSME, Different schemes : TECKSOK, KIADB, KSSIDC, DIC Single window agency: SISI, NSIC, SIDBI, KSFC. Concept of GST and its importance.</p>	10 Hrs	L1, L2, L3
<p>MODULE 4: Business planning process: Meaning of business plan, Business plan process, advantages of business planning, Marketing plan, production / operations plan, Organization plan, Financial plan and final project report with feasibility study, preparing a model project report for starting a new venter. Business planning in Textile & Garment Industry. Study of MBO, MBE, Importance of decentralisation.</p> <p>Lean Manufacturing: History and definition. Principles and advantages. Tools, Base for apparel industry 5M, 7waste, Concepts, Kaizan, Kamban, 5S, JIT just in time, PDCA, SQCD. Comparison of lean and 6-sigma.</p>	10 Hrs	L1, L2, L3,
<p>MODULE 5: International Entrepreneurships Opportunities: The nature of international entrepreneurship, importance of international business to the firm, International versus domestic entrepreneurship, Stages of economic development, entrepreneurship entry in to international business, exporting, direct foreign investment, Barriers to international trade.</p>	10 Hrs	L1,L2, L3
OUTCOME:		

1.The course will prepare students to face problems of industry and to work effectively in various textile and Garment industry

1. The course will motivate the students to become team leaders, entrepreneurs in industries

Text Books:

1. Principles of management by TirpathiP.C and P.N.Reddy,
2. Entrepreneurship by Poornima Charinthimath,
3. Management P.N.Reddy

Reference Books:

1. Essentials of management : An International and leadership perspective by Harold, Koontz, Heinz Wehrich,
2. Project management and control by Narendra Singh
3. Work Quality management in textile industry- B. Purushottam

SPINNING TECHNOLOGY – III [As Per Choice Based Credit System (CBCS) Scheme] SEMESTER - V			
Subject Code	15TX52	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES : The objective of this Course is to make students understand the basic spinning processes in Textile Industry and to understand the various spinning operations such as Ring frame Doubling and unconventional methods of spinning. Students acquire theoretical knowledge about the machineries used			
MODULES		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Objects of ring spinning, study of different drafting systems and type importance. Principles of twisting, factors affecting the twist Calculation, Difference between Actual and Practical TPI. Principal of winding. Types of built. Roller setting, draft and its calculation. Rings and Travelers. Different types of rings, selection of rings and manufacture of rings. Types of travelers, traveler numbering both in direct and indirect system. Manufacture of travelers.		10Hrs	L1, L2
MODULE 2: Forces acting on traveler. Faulty packages of Ring frame and remedial measures. Modern developments of Ring frame and salient features of the present day ring frame. Calculations of Ring frame such as production, efficiency, Traveller speed and count etc. Various quality control studies at Ring frame such as breakage study, idle spindle study, snap study and yarn parameter such as U%, CV%, Neps CSP, Actual and Nominal count etc.		10Hrs	L1, L2
MODULE 3: Doubling frame – objects of doubling and conditions to get balanced double yarn. Preparation of doubling, Types of doubling systems. Study of Two for one twister. Threading through different types of wet doubling		10 Hrs	L1, L2, L3

systems. Defects in doubling and remedies. Open-end spinning – principle and objects of open-end spinning. Classification of open-end spinning.		
MODULE 4: Principle and Technique of rotor spinning and detailed study of rotor spinning such as initial drafting, transport zone, twisting and yarns formation Types of opening rollers and rotors and their effect on the performance of OE machine. Calculations of Open end spinning machines. Modern developments in OE machine.	10 Hrs	L1, L2, L3, L4
MODULE 5: Study of Types of Sewing threads and their applications. Fancy yarns and their production and applications Study of Advanced Spinning systems such as DREF spinning, Air jet spinning, Twist less spinning, Bob-Tex Spinning, Core and Cover spun yarn spinning. Quality studies of all unconventional methods of spinning. Comparison between conventional and unconventional methods of spinning	10 Hrs	L2, L3
COURSE OUTCOMES: On completion of this course, Students will be able to 1. Learn the various spinning processes carried 2. Gain knowledge about the machinery and Process about Ring frame, Doubling frame and other unconventional methods of spinning 3. Will be able to understand the basics of spinning Technology		
Graduate Attributes (as per NBA) ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data		
Scheme of Examination / Question paper pattern • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module		
Text Books: 1. Manual of Cotton Spinning -Vol V, Ed, AFW COULSON 1958, Textile Institute, Manchester 2. Technology of short staple spinning - Vol III and IV, W Klein, 1989, Textile Institute Pub.Manchester 3. Spun Yarn Technology - Oxtoby 1987, Butterworths, London 4. Cotton Spinning Calculations - T. K. Pattabhiraman, 1979, Soumaya Pub, Bombay 5. O. E. Spinning - R. Rajgopalan, 1981, Textile Association of India, Delhi 6. Spinning in 70s -P.R. Lord, 1970, Merrow Pub. Co. Ltd. London

4. NCUTE Pilot Programme

FABRIC MANUFACTURING TECHNOLOGY – III

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - V

Subject Code	15TX53	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

CREDITS - 04**COURSE OBJECTIVES :**

This course aims at updating the knowledge of students in the following field of Fabric Manufacturing Technology.

1. Dobby Mechanisms, designs, constructions, settings, recent advance in doobby, lattice preparations.
2. Jacquard Shedding various types, open shed, jacquard special jacquard M/c, Harness systems
Tie- ups card cutting and casting out.
3. Unconventional looms: Prerequisites, selection, Requirements, weft insertion stages advantages Techno economic feasibilities.

Modules	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Introduction to doobby, Classification, comparisons of tappet, doobby, jacquard, Characteristics of different doobby, Keighly doobby, cam doobby, paper controlled doobby, cross border doobby, pick finding devices for doobby, timings & settings, positive doobby's, different types of positive doobys, Characteristics & working C/B doobby method of pegging lattice for left hand & right hand doobby.	10 Hrs	L1, L2
MODULE 2: Jacquard functions, Types of Jacquard, principle parts of jacquard. Working principle of single lift single cylinder,	10 Hrs	L1, L2

double lift single cylinder Double lift double cylinder and cross border jacquard, Special jacquard m/c.		
MODULE 3: Developments in mechanical Jacquard, open shed Jacquards, Jacquard harness tie-ups card cutting m/c and producers, casting out, increasing figuring capacity of Jacquard, Electronic Jacquard, programming possibilities in jacquard.	10 Hrs	L1, L2, L3
MODULE 4: Introduction to unconventional looms, disadvantages of conventional looms. Unconventional selvages, classification of shuttle less looms, weft accumulators, prerequisites for installation of shuttle less weaving m/c. yarn quality requirements, Weft insertion by Projectile, Weft insertion stages. Torsion bar picking, salient features of projectile looms.	10Hrs	L1, L2, L3, L4
MODULE 5: Classification of Rapier looms. Weft insertion stages in Dewas& Gabler system salient features. Air quality requirements for Air Jet, method of weft insertion on Air jet, water Jet looms multiphase, weaving flat multiphase circulars looms Narrow looms, triaxial looms. Management of loom shed, plant layout, ventilation & humidification, lighting & material handling.	10Hrs	L2, L3
COURSE OUTCOMES:		
<ol style="list-style-type: none"> 1. This course prepares the students to know the dobby, jacquard application and new concepts. 2. Students are exposed to the unconventional methods of weaving, techno economic studies, productivity & material handling. 3. Students are able to understand the preparatory process & yarn quality requirements. Loom maintenance and management of loom shed. 		
Graduate Attributes (as per NBA)		
<ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern		
<ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module

CHEMICAL PROCESSING OF TEXTILES -III

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - V

Subject Code	15TX54	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

CREDITS - 04

COURSE OBJECTIVES :

The objective of this Course is to make students understand the advanced concepts of chemical processing sequences such as printing and finishing. To make them analyze the process conditions in various printing processes, recipes etc. Students will be made to understand and analyze the concepts of textile finishing processes, finishing chemicals and advancements in the areas of printing and finishing techniques.

MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
<p>MODULE 1: INTRODUCTION TO TEXTILE PRINTING - An overview of the printing process. Selection of dyes/pigments/auxiliaries and textile substrate to suit the end use of the printed textile materials. The constituents and characteristic of printing paste. Brief study of different binders, thickeners, solvents, discharging agents and other ingredients of printing paste</p>	10Hrs	L1, L2
<p>MODULE 2: STYLES OF PRINTING – Direct, discharge, resist and special styles - chemicals and mechanisms used for the above styles. METHODS OF PRINTING – Printing by Hand block, Roller, hand screen, semi -automatic screen, flatbed and</p>	10Hrs	L1, L2

rotary screen printing methods. Developments in printing machinery.		
MODULE 3: TRANSFER PRINTING – Principle, mechanisms and continuous transfer printing – Transfer printing machinery. METHODS OF PRINT FIXATION – Drying, curing by dry heat, steam fixation etc.	10 Hrs	L1, L2, L3
MODULE 4: FINISHING - objects and methods of finishing. Classification of various finishes – Various finishing chemicals used and their properties. CALENDERING – Principle, types of calendaring machines used, merits and demerits. SANFORIZATION – principle and the process. Anti-crease finish on cotton and protein fibre fabrics. Water repellent/proof finishes, fire retardant finishes. Finishing of woolen materials, silk fabrics and blended products.	10 Hrs	L1, L2, L3, L4
MODULE 5: Finishing of synthetic fibre fabrics - heat setting, de-lustering, anti-static, soil release finishes. Fundamentals of computerized colour matching – K/S evaluation and principle of spectrophotometers.	10 Hrs	L2, L3
COURSE OUTCOMES: On completion of this course, Students will be able to 1. Learn the various printing styles and processes carried out. 2. Gain knowledge about the machinery and process parameters of various printing machines used in textile/garment industry 3. Will be able to understand the basics and advances in finishing technology.		
Graduate Attributes (as per NBA) <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module

KNITTING TECHNOLOGY

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - V

Subject Code	15TX551	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

CREDITS - 04**COURSE OBJECTIVES :**

The objective of this course is to make students understand the basic concepts of Warp and weft knitting operations on all knitting machines.

MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
<p>MODULE 1: Knitting industries position in India, general terms and principles of knitting technology. Knitting Elements, Elements of knitted loops structures. Comparison of warp and weft knitting.</p> <p>WEFT KNITTING: The four primary weft knitted structures –Plain, Rib, Interlock and Purl. Production of above structures on knitting machines</p>	10Hrs	L1, L2
<p>MODULE 2: Types of weft knitting machines – flat machines and circular machines. Knit, Tuck and Float stitches. The effect of Tuck and float stitches on knitted fabrics. Ornamentation of weft knit structures: Horizontal striping, intarsia, plaiting.</p>	10Hrs	L1, L2
<p>MODULE 3: Derivatives of plain and rib structures. Double knits. Needle selection for weft knit designing: Multi cam track, Pattern wheel, Pattern drum and Electronic</p>	10Hrs	L1, L2, L3

selection device.		
MODULE 4: Aspects of knitting science- knitted fabric geometry, tightness factor, robbing back, and needle bounce. Different types of positive feeds and their advantage. Different cams used on knitting machine. Properties of hosiery yarns. Defects in weft knitted fabrics.	10Hrs	L1, L2, L3, L4
MODULE 5: Principles of warp knitting; Swinging and shogging motion. Five basic overlap, under-lap variations. Study of Tricot and Raschel warp knitting machines. Single bar structures. Piller stich, single tricot and atlas structures. Two bar fabrics: Lock knit, full tricot and satin.	10Hrs	L2, L3
COURSE OUTCOMES:		
<ol style="list-style-type: none"> 1. Students will be able to understand the production of warp and weft knitted structures. 2. Student's practical knowledge will be updated regarding different types of knitted structures such as single jersey, rib structures. 3. Students will be able to perform well in knitting industries. 		
Graduate Attributes (as per NBA)		
<ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern

TEXTILE MECHANICS AND CALCULATIONS

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - V

Subject Code	15TX552	IA Marks	20
--------------	---------	----------	----

No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
The objective of this course is to describe the types of driving arrangement to the parts of Textile machineries. Students acquire theoretical and Practical Knowledge on calculations pertaining to textile operations.			
Modules		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Transmission of Motion by belt and gear drives. Design difference between belt and gear drives. Effect of Belt thickness on speed of different parts. Study of Centrifugal and Centripetal force. Brief Explanation of Fast and loose pulleys and grooved pulleys.		10Hrs	L1, L2
MODULE 2: Rack and Pinion, Traversing mechanisms. Determination of Speed through gear and pulley drives, sun and planet gears in spinning and weaving industry. Study of different types of cams such as 3 leaved cam, Heart shaped cam and Irregular shaped cam and their utility in spinning industry. Types of tappet cams and their application in weaving industry		10Hrs	L1, L2
MODULE 3: Study of Roller eccentricity and its effect on drafting rollers of spinning machineries. Construction and Displacement, Velocity and acceleration diagrams. Rectification of roller eccentricity. Types of drafting rollers and their importance. Importance of eccentricity in weaving machineries		10 Hrs	L1, L2, L3
MODULE 4: Study of clutches and brakes and their utility. Study of shedding, picking and beat-up and other mechanisms. Essential weaving calculations like winding rate in double flanged bobbin, cone precision winders.		10 Hrs	L1, L2, L3, L4

MODULE 5: Production calculations related to weaving, Warping and sizing. Reed calculations. Problems related to efficiency. Yarn count calculation in direct and indirect system. Average count and resultant count and fabric weight calculations.	10 Hrs	L2, L3
COURSE OUTCOMES: On completion of this course, Students will be able to 1. Learn the types of driving arrangement on Textile Machineries. 2. Gain knowledge about Speed calculation 3. Update their basic knowledge about driver and driven parts.		
Graduate Attributes (as per NBA) <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of Sixteen marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		
Text Books: <ol style="list-style-type: none"> 1. Textile Mathematics Volume 1,2,3 by J.E. Booth 2. Textile Mechanics by Textile Institute Volume 1 & 2 3. Weaving calculations by Sengupta. 		
REFERENCES:: <ol style="list-style-type: none"> 1. Basic Textile Mathematics by A.K. Khare 2. Hand book of Cotton Spinning, William Taggart., Universal Publ. Corp. 1979. 3. Essential Facts of Practical Cotton Spinning, Pattabhiraman. T.K., Soumya Pub., Bombay 1979. 		

ERECTION AND MAINTENANCE OF TEXTILE MACHINERY [As Per Choice Based Credit System (CBCS) Scheme] SEMESTER - V			
Subject Code	15TX553	IA Marks	20

No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
The objective of this course is to make students understand the basic spinning processes in Textile Industry and to understand the various spinning operations such as Blow Room, Carding. Students acquire theoretical knowledge about the machineries used. They will be familiarized with erection and maintenance schedules of various machineries used in spinning and weaving.			
Modules		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Basic definitions related to mechanical design, vibration resistance, heat resistance, reliability, longevity, maintainability .Brief outline of engineering material. Different kinds of tools and the devices employed for erection and maintenance. Erection of machines, hoisting - equipment, overhead cranes, machine installation conditions. Functions, prerequisite of maintenance and its classification.		10Hrs	L1, L2
MODULE 2: Function and classification of power transmission equipment and transmission members. Erection of machines, hoisting - equipment, overhead cranes, machine installation conditions. Functions, prerequisite of maintenance and its classification.		10Hrs	L1, L2
MODULE 3: Methods and kinds of repairs of textile equipment used in different departments. Cleaning and washing of parts. Various kinds of wears. Main factors influencing the wear of machine parts and methods increasing their wear resistance. Failure prediction of parts, units and mechanisms		10 Hrs	L1, L2, L3
MODULE 4: Basic concepts of maintenance, Study of different maintenance programme, routine and preventive, predictive, remedial and restorative maintenance. Maintenance of spinning, weaving, processing equipment as per the schedule.		10 Hrs	L1, L2, L3, L4
MODULE 5: Function of prerequisite of lubricants, different lubricants used in the textile industry, method of lubrication. Maintenance of ledgers spare parts etc. machinery maintenance audit and its advantages. Housekeeping, overhauling.		10Hrs	L2, L3

COURSE OUTCOMES:

On completion of this course, Students will be able to

1. Learn the various spinning processes carried
2. Gain knowledge about the maintenance of all the Textile Machineries
3. Learn the types of maintenance

Graduate Attributes (as per NBA)

- **Engineering Knowledge**
- **Problem Analysis**
- **Design/development of solutions (partly)**
- **Interpretation of data**

Scheme of Examination / Question paper pattern

- Two full questions (with a maximum of four sub questions) of Sixteen marks each to be set from each module. Each question should cover all contents of the respective module.
- Students have to answer five full questions choosing one full question from each module

Text Books:

1. **Spinning Textile machinery maintenance-** Pub, SITRA Coimbatore 1980
2. **Weaving Textile Machinery maintenance Pub-** BITRA, Bombay 1980
3. **Spinning, Weaving- & processing machinery maintenance in textile mills-** B.B. Joshi, et al, Textile & Allied industry research organization, Baroda, 1970

NANO TEXTILES

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - V

Subject Code	15TX554	IA Marks	20
Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

CREDITS - 04**COURSE OBJECTIVES :**

- To teach the concept of nano technology and its application in textiles.
- To educate the production of nanofibres by different process
- To impart knowledge on nano composites and their properties.

MODULES

Teaching Hours

Revised Bloom's Taxonomy (RBT) Level

<p>MODULE 1: Nano fibres Process: Electro spinning – properties – improvement – fibre morphology – fibre alignment. Bicomponent cross sectional nano fibre</p>	<p>10Hrs</p>	<p>L1, L2</p>
<p>MODULE 2: Nanotubes and Nano Composites Carbon nano tubes: synthesis – characterization techniques – nano tubes – Polymer fibres – structures – production process – properties – fibre morphology. Carbon nanotubes applications</p>	<p>10Hrs</p>	<p>L1, L2</p>
<p>MODULE 3: Nanofiller Polypropylene Fibres Polymer layered silicate nano composites: structure and properties – Nano composites Dyeing of Polypropylene – Modified propylene for improved dyeability. Assessment of dyed polypropylene</p>	<p>10Hrs</p>	<p>L1, L2, L3</p>
<p>MODULE 4: Nano Coating of Textiles Surface modification techniques – anti-adhesive nano coating of fibre and textiles – water and oil repellent coating – self-cleaning. Functional textiles: protection – applications. Applications of nano coated textiles for filtration</p>	<p>10Hrs</p>	<p>L1, L2, L3, L4</p>
<p>MODULE 5: Hybrid Polymer Nanolayers Thin hybrid film – smart textiles – polymer to polymer hybrid layers – polymer to particles hybrid layers. Nanofabrication of thin polymer fibre – “Grafting from” and “Grafting to” techniques for synthesis of polymer films, synthesis of smart switchable coatings. Synthesis of hydrophobic materials</p>	<p>10Hrs</p>	<p>L2, L3</p>
<p>COURSE OUTCOMES:</p> <ul style="list-style-type: none"> • The graduates will become familiar with fundamentals of various science and technology subjects and thus acquire the capability to applying them. • The graduates will demonstrate their ability to solve technical problems via technical approaches, self-study, team work and life-long learning approaches. • The graduates will develop capacity to understand professional and ethical responsibility and will display skills required for continuous and life-long learning and up gradation. • The graduates will have sound foundation for entering into higher education programmes. 		
<p>Graduate Attributes (as per NBA)</p>		

<ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data
<p>Scheme of Examination / Question paper pattern</p> <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module

SPINNING TECHNOLOGY LAB-III			
[As per Choice Based Credit System (CBCS) scheme]			
SEMESTER – V			
Laboratory Code	15TXL56	IA Marks	20
Number of Lecture Hours/Week	01 Hr Tutorial (Instructions) + 02 Hours Laboratory	Exam Marks	80
		Exam Hours	03
CREDITS – 02			
Course objectives:			
The objective of this course is make students understand and practically carryout experiments pertaining to spinning subject. The experiments designed will enable them to practically analyse the importance of each process and calculations related to them			
Laboratory Experiments:			Revised Bloom's Taxonomy (RBT) Level
NOTE: The experiments are to be carried using discrete components only.			
1. Study of passage of material through Ring Frame and demonstration of its working and functions of each parts.			L5, L6
2. Calculation of spindle speed, front roller speed TPI through gearing			L2, L3, L4

diagram and also by changing the pulleys and concerned change wheels	
3. Calculation of Twist constant through gearing and also TPI calculation for different TCP	L2, L3, L4
4 Break Draft, Main Draft and Total draft calculation through gearing diagram.	L5, L6
5. Study of building mechanism and different types of builds.	L5, L6
6. Working of Ring Frame and calculation of count of yarns for the roving fed by changing the wheels	L2, L3, L4
7. Working of Ring Frame with different Twist Change wheels	L5, L6
8. Maintenance schedule of Ring Frame	L2, L3, L4
9. Calculation of Spindle Speed, TPI through gearing on doubling frame	L2, L3, L4
10. Calculation of twist constant, TPI & TPM for different TCP.	L5, L6
11. Demonstration and calculation on O.E. Spinning machine.	L5, L6
12. Practicing and piecing on Ring Frame and study of end breaks	L5, L6
Course outcomes:	
<ol style="list-style-type: none"> 1. Students will be able to carry out the experiments practically. 2. They will be exposed to various process conditions, production calculations and settings. 3. The subject makes them thorough with various settings of machines and handling to produce the required products. 	
Graduate Attributes (as per NBA)	
<ul style="list-style-type: none"> • Engineering Knowledge. • Problem Analysis. • Design/Development of solutions. 	
Conduct of Practical Examination:	
<ol style="list-style-type: none"> 1. All laboratory experiments are to be included for practical examination. 2. Students are allowed to pick one experiment from the lot. 3. Strictly follow the instructions as printed on the cover page of answer script for breakup of marks. 4. Change of experiment is allowed only once and 15% Marks allotted to the procedure part 	

to be made zero.

FABRIC MANUFACTURING TECHNOLOGY LAB-III			
[As per Choice Based Credit System (CBCS) scheme]			
SEMESTER – V			
Laboratory Code	15TXL57	IA Marks	20
Number of Lecture Hours/Week	01Hr Tutorial (Instructions) + 02 Hours Laboratory	Exam Marks	80
		Exam Hours	03
CREDITS – 02			
Course objectives:			
1. The students will learn the preparation of pattern for dobbies and study the types of jacquards, harness and its tie-ups and prepare designs by using point paper and card cutting. 2. The students will study about the working of knitting machine, and calculate the speeds and production. 3. Learn about various knitted structures produced and do the analysis knitted fabrics and find out the particulars like WPI, CPI, Stitch density, Stitch length, loop shape factor, GSM, Kc, Kw, Ks, tightness factors			
Laboratory Experiments:			Revised Bloom's Taxonomy (RBT) Level
NOTE: The experiments are to be carried using discrete components only.			
1. Study of working, timing & settings of dobbies.			L5, L6
2. Pattern preparation for dobby loom by using pegs and lags.			L2, L3, L4
3. Study of different types of jacquards.			L2, L3, L4
4. Study of harness and its tie-ups.			L5, L6
5. Preparation of squared paper design for 100 hooks jacquard and card punching.			L5, L6
6. Study of single jersey knitting machine: drive, knitting elements, yarn feed mechanisms, take down mechanisms and practice of knitting.			L2, L3, L4
7. Study of Rib knitting machine: drive, knitting elements, yarn feed mechanisms, take down mechanisms and practice of knitting.			L5, L6

8. Study of Interlock knitting machine: drive, knitting elements, yarn feed mechanisms, take down mechanisms and practice of knitting.	L2, L3, L4
9. Analysis of knitted fabrics for WPI, CPI, Stitch density, Stitch length, loop shape factor, GSM, Kc, Kw, Ks, tightness factors for single jersey and rib structures as per standard.	L2, L3, L4
10. Analysis of knitted fabrics for design: loop diagram, feeder diagram and graphical motions.	L5, L6
11. Analysis of modified single jersey design: loop diagram, feeder diagram and graphical motions.	L5, L6
12. Study of spirality of single jersey fabrics.	L5, L6
Course outcomes:	
<ul style="list-style-type: none"> ➤ Students will be able to understand to prepare the designs and produce the samples on the loom. ➤ Students will be able understand the working of knitting machine, its elements and how to produce the knitted structures 	
Graduate Attributes (as per NBA)	
<ul style="list-style-type: none"> • Engineering Knowledge. • Problem Analysis. • Design/Development of solutions. 	
Conduct of Practical Examination:	
<ol style="list-style-type: none"> 1. All laboratory experiments are to be included for practical examination. 2. Students are allowed to pick one experiment from the lot. 3. Strictly follow the instructions as printed on the cover page of answer script for breakup of marks. 4. Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero. 	

CHEMICAL PROCESSING OF TEXTILES LAB-III			
[As per Choice Based Credit System (CBCS) scheme]			
SEMESTER – V			
Laboratory Code	15TXL58	IA Marks	20
Number of Lecture Hours/Week	01Hr Tutorial (Instructions) + 02 Hours Laboratory	Exam Marks	80
		Exam Hours	03
CREDITS – 02			
Course objectives:			
<ol style="list-style-type: none"> 1. This subject aims to acquire knowledge of various color theory and printing process of textiles. 2. Practical knowledge on different printing process bring more confidence in students 			

<p>and they are exposed to different equipments, printing recipes.</p> <p>3. Knowledge on recent developments.</p>	
<p>Laboratory Experiments:</p> <p>NOTE: The experiments are to be carried using discrete components only.</p>	<p>Revised Bloom's Taxonomy (RBT) Level</p>
1. Preparation of colour charts by light, pigment, chromatic circle and Brewster's theory	L5, L6
2. Preparation of printing paste using pigment colours	L2, L3, L4
3. Printing practice using Hand blocks and screens with various classes of dyes	L2, L3, L4
4. Preparation of screens for screen-printing.	L5, L6
5. Resist style (batik) of printing on fabrics	L5, L6
6. Discharge style of printing on cotton, PET and silk	L2, L3, L4
7. Tie and dye printing	L5, L6
8. Anti-crease finishing of cotton using formaldehyde and non-formaldehyde based chemicals	L2, L3, L4
9. Softening of cotton and wool	L2, L3, L4
10. Water proof finishing on cotton	L5, L6
11. Experiments on fastness properties of dyed and printed fabrics	L5, L6
12. Evaluation of dye uptake- K/S using spectrophotometer	L5, L6
13. Experiments on Finishing of garments	
<p>Course outcomes:</p> <p>1. This course helps the students to acquire practical knowledge of various color theory and printing process.</p> <p>2. Students are exposed to process control, chemicals and auxiliaries used, instruments.</p> <p>3. This subject prepare the students work in various chemical processing industries.</p>	

Graduate Attributes (as per NBA)

- Engineering Knowledge.
- Problem Analysis.
- Design/Development of solutions.

Conduct of Practical Examination:

1. All laboratory experiments are to be included for practical examination.
2. Students are allowed to pick one experiment from the lot.
3. Strictly follow the instructions as printed on the cover page of answer script for breakup of marks.
4. Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero.

SEMESTER – VI**SERICULTURE AND SILK TECHNOLOGY**

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VI			
Subject Code	15TX61	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
This course aims at updating the knowledge of students in the following field of Silk fiber Technology.			
<ol style="list-style-type: none"> 1. Status of sericulture and growth of silk industry in India & abroad 2. Principles of Rearing silk worms, environmental condition of rearing, grainages. 3. Physical and commercial characteristic of cocoon reeling M/c. Technology advancements 4. Silk by products, wet processing, and recent developments in wet processing. 			
MODULES		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Introduction to Sericulture and silk industry, Status of sericulture and silk industry in India and abroad. Mulberry cultivation practices, environmental conditions, types of mulberry, Silk worm rearing, and Environmental conditions for silk worm rearing, various methods. Chawki rearing, Late age silk worm rearing, recent developments in rearing. Seed production & Grainage activities. Diseases & pests & their control		10 Hrs	L1, L2
MODULE 2: Different types of cocoons, Physical and commercial characteristics, sorting and testing of cocoons. Stifling of cocoons, objects, various methods: open pan, three pan, Conveyor cooking etc. Merits & Demerits of silk reeling, systems of reeling, charka, Cottage basin, multi end filature automatic reeling machine, Re-reeling, recent developments in silk reeling		10Hrs	L1, L2
MODULE 3: Silk throwing, Objects, Winding, doubling, Rewinding and twisting, Manufacture of silk yarns for ordinary, Chiffon, Crape, Georgette fabrics. Recent developments in silk throwing machines. Silk weaving preparatory for warp & weft yarns, handloom &		10Hrs	L1, L2, L3

power looms special features, modifications required to weave silk fabrics		
<p>MODULE 4: Introduction to spun silk industry, Different source of waste, Sequence of operations in spun silk production, end uses of spun silk yarns. Noil yarns.</p> <p>Testing & grading of silk yarns. Chemical processing of silk degumming of silk fabrics.</p>	10 Hrs	L1, L2, L3, L4
<p>MODULE 5: Dyeing of silk fabrics. Printing & finishing of silk fabrics. Recent developments in wet processing of silk fabrics, silk by-products, properties and application.</p> <p>Introduction to non-mulberry silks and their applications.</p>	10 Hrs	L2, L3
<p>COURSE OUTCOMES:</p> <ol style="list-style-type: none"> 1. This course make the students to understand silk potential in India and abroad 2. Student can take the projects and research work in Silk Technology field jointly with KSSRDI, central silk board, and State Silk Board. 3. Students to be become entrepreneurs in silk industries like Reeling, Twisting, Silk weaving and by products this course will give valuable outputs 		
<p>Graduate Attributes (as per NBA)</p> <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
<p>Scheme of Examination / Question paper pattern</p> <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of Sixteen marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Hand Book of practical sericulture- S R Ullal and M N Narasimhanna,1987 2. Silk manual- FAO Publication 3. Hand Book of Silk Technology- T N Sonwalkar 4. Mulberry silk Reeling Technology- D. Mahadevappa, V G Halliyal, D G Shankar, Ravindra Bhandiwad, Oxford and IBH publishing company Pvt. Ltd, 2000 		
<p>REFERENCES::</p> <ol style="list-style-type: none"> 1. Silk Weaving- Compiled by Zhejiang Silk engineering institute. 		

TEXTILE TESTING - I

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VI			
Subject Code	15TX62	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
The objective of this course is to make students understand the importance of textile testing and quality control in textile industry. Students are trained to understand various methods and instruments used for testing of fibres and yarns. Students are trained to test the fibres and yarns for various properties, and, calculate, analyse, compare and draw suitable conclusions.			
Modules		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Introduction to textile testing & quality control. Sampling techniques. Conditioning of Testing lab and textile materials. Moisture regain and its measurement by various techniques.		10Hrs	L1, L2
MODULE 2: Fiber dimensions Viz., length, fineness, maturity and strength- technological importance & determination by various conventional methods. Neps, causes & effects of nep generation, nep counting.		10Hrs	L1, L2
MODULE 3: Fibre Quality Index (FQI), its importance & calculations. Study of High Volume Instrument (HVI), modules and fibre quality testing parameters. Application of HVI results in spinning mills. Advanced Fibre Information System (AFIS) - working principle, features. AFIS test data analysis.		10 Hrs	L1, L2, L3
MODULE 4: Study of various systems of yarn count & its measurements by various methods & instruments. Yarn twist & its effects on yarn & fabric properties. Importance of twist multiplier. Principles & measurements of single yarn and double yarn twist.		10 Hrs	L1, L2, L3, L4

<p>MODULE 5: Yarn strength & its importance. Methods and principles of yarn strength testing. Instruments and measurement of yarn strength. Yarn friction and its measurement. Study of norms and standards pertaining to above fibre and yarn properties.</p>	<p>10 Hrs</p>	<p>L2, L3</p>
<p>COURSE OUTCOMES: On completion of this course, Students will be able to</p> <ol style="list-style-type: none"> 1. Do testing of textile fibres and yarns 2. Learn methods and principle of testing involved 3. Know the instruments used and the principle of working 4. Understand the quality parameters of textile materials 5. Do the tabulation test results, analysis and comparison 		
<p>Graduate Attributes (as per NBA)</p> <ol style="list-style-type: none"> 1. Engineering knowledge and its application to measure the quality of fibres and yarns 2. Understanding quality of fibres and yarns 3. Analysis quality problems 4. Design/development and solutions for quality problems 5. Interpretation of test data and conclusion 		
<p>Scheme of Examination / Question paper pattern</p> <ol style="list-style-type: none"> 1. Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. 2. Students have to answer five full questions choosing one full question from each module 		
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Physical testing of textiles – B.P. Senville, Wood Head – 1999. 2. Principles of Textile Testing, Booth J. E., Butterworth, Wendon III Edition. 3. Handbook of Textile Testing and Quality Control, Grover and Hamby, Wiley Eastern Pvt. Ltd., New Delhi 1969. 4. Physical Properties of textile fibres, Morton and Hearle, The Textile Institute, Manchester. 5. Textile Testing, Skinkle –T. B. Tarapurwal sons and co. Pvt Ltd., Bombay. 6. FASHION DESIGN AND GARMENT MANUFACTURE

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VI

Subject Code	15TX63	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

CREDITS - 04

COURSE OBJECTIVES :

This course aims at updating the knowledge of students in the following field of Fashion designing & Garment Technology.

1. Fashion Concepts consumer expectation about textiles. Fashion theories design elements psychological influence of clothing. Techniques of body measurement standard sizes selection of fashion for different end uses.
2. Garment flow process, sourcing, sourcing issues global sourcing fabric inspection procedures, spreading various cutting methods garment making process.
3. Technology advancement process sewing m/c production techniques, Garment inspection, Shipping, SMV

Modules	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Consumer expectation of textiles. Consumer knowledge about textiles. Fashion Terminologies, elements of design, fashion theories, Factors influence fashion, Fashion cycle, Principles of design. Selection of fabrics for different end uses. Measurement Techniques	10 Hrs	L1, L2
MODULE 2: Sourcing, Global sourcing, Role of sourcing discussion in Apparel firms. Material sourcing process. Fabric inspection methods. Principle & practices of pattern making. Grading, Computer aided pattern making spreading, cutting, Numbering & bundling.	10Hrs	L1, L2
MODULE 3: Study of different types of stitches & seams. Seams appearance & performance, study of sewing threads. Thread consumption calculation, sewing needles, Fundamentals of swing M/c, different types of sewing	10Hrs	L1, L2, L3

M/c. Work aids, puckering, reasons and remedies for different types of puckering		
MODULE 4: Pressing: Types, Elements of pressing. Types of pressing equipment's. Technological advancement fusing Advantages, requirements, Fusing processes. Equipment's, methods, support materials purpose. Lining, Inter linings, Closures, Zippers, Buttons, snaps, Hooks, loop tape, Elastics, trims, Types &source of trims.	10 Hrs	L1, L2, L3, L4
MODULE 5: Apparel production systems garment Quality control Inspection of garments. Under different AQL standards like 2.5, 3.0 & 4.0 concept of production planning productivity, resource management Ergonomics apparel Engineering basic concepts work flow on work study techniques, SMV Calculation. Costing - Procedures, systems of costing, stages of costing, pricing strategies. Textile product labelling and care instructions.	10 Hrs	L2, L3
COURSE OUTCOMES: This course prepare the students to know about <ol style="list-style-type: none"> 1. Fashion & garment industries, fashion trends, fashion forecasting, consumer expectations of textiles. 2. Students are able to understand the production process, quality control, quality control studies, merchandising process, export & import policies. 3. Students who want to become entrepreneurs this course gives the detailed input to startup new garment industries 		
Graduate Attributes (as per NBA) <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of Sixteen marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		
Text Books: <ol style="list-style-type: none"> 1. The Technology Of Clothing Manufacture- Carr H. & Latham B., 1988, Blackwell ScientificPublication, Oxford England 2. FABRIC STRUCTURE AND DESIGN - I			
[As Per Choice Based Credit System (CBCS) Scheme]			
SEMESTER - VI			
Subject Code	15TX64	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
<p>The objective of this course is to make students to learn analysis of fabrics for their various construction particulars, manufacturing data and basic designs. Students are to understand the characteristic features and aesthetic qualities of different fabrics To understand various basic designs in order to impart aesthetic value to the fabrics. Students are understand the raw material requirements, machine and equipment for the production the fabric. Students understand the end uses of different fabrics and their suitability.</p>			
Modules		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Classification of plain woven cloths - approximately square, warp faced and weft faced fabrics, examples of cloths with construction particulars and their applications. Elements of woven fabric structure - weaves and weave notations. Yarn crimp, cover factor & fabric weight. Drawing-in (Draft), Lifting, Denting plans.		10Hrs	L1, L2
MODULE 2: Ornamentation of plain fabrics. Modification of plain weaves – Rib, Matt etc. Special Rib, haircord, & mock rib structures. Twill weaves and fabrics, Twist & twist interactions. Derivatives of twill weaves. Diamond and diaper designs. Satin & Sateen weaves & fabrics.		10Hrs	L1, L2
MODULE 3: Simple fancy weaves such as honeycomb, brighten		10Hrs	L1, L2, L3

honeycomb, Huck a back, sponge-weaves, Mock leno, crepe & corkscrew weaves. Distorted thread effects. Bedford cord weaves and fabrics.		
MODULE 4: Colour & weave effects. Classification of colour and weave effects, examples of simple colour & weave combinations. Colour & weave combinations to construct longitudinal stripes, cross stripes, check effects etc. BIS standards for the important commercial fabrics.	10Hrs	L1, L2, L3, L4
MODULE 5 Light and pigment colour theory. Classification of colours. Attributes of colours. Modifications of colours. Color harmony and color contrast. Mixed colored effects with the aid of fibre mixture yarns, twist yarn mixtures and combined colored threads in the fabrics. Various bases of textile design for figured arrangements. Brief study of history of textile design. Brief study of various historical designs with respect to their main features.	10Hrs	L2, L3
COURSE OUTCOMES: On completion of this course, Students will be able to		
<ol style="list-style-type: none"> 1. Learn various construction particulars and manufacturing data 2. Learn raw requirements and loom equipment required to produce the fabric. 3. Learn the analysis of simple basic designs and features of various fabrics 4. Understand the suitability of these fabrics for particular end uses. 		
Graduate Attributes (as per NBA)		
<ol style="list-style-type: none"> 1. Engineering knowledge related fabric designing 2. Design analysis and aesthetic qualities 3. Design/development of basic designs 4. Interpretation of design details and development of new designs 		
Scheme of Examination / Question paper pattern		
<ol style="list-style-type: none"> 1. Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. 2. Students have to answer five full questions choosing one full question from each module 		
Text Books:

4. **Modern Textile Design and Production-** R. H. Wright, National Trade Press, London 1970
5. **History of Textile Design-** V. A. Shenai, Sevak Pub Ltd, 1974.

OPERATIONS RESEARCH TECHNIQUES

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VI

Subject Code	15TX651	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

CREDITS - 04

COURSE OBJECTIVES :

The objective of this Course is to make students understand the basic objectives of operation research and phases of operation research technique and its applicability in textile and garment industries.

Modules	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Definition of OR. Phases of OR technique. Linear programming problem by graphical and simplex method. Assignment problem by Hungarian method Balanced and unbalanced matrix. Profit and cost matrix. Problems pertaining to these matrix	10Hrs	L1, L2
MODULE 2: TRANSPORTATION PROBLEM: Vogel's approximation method – Determination of Optimal solution by MODI method, North west corner Rule and- Least cost entry method	10Hrs	L1, L2
MODULE 3: Replacement. Objects of replacement. Types of Replacement such as Individual replacement, Group replacement. Problems pertaining to these types of replacement problems. problems	10 Hrs	L1, L2, L3
MODULE 4: Queing theory, queue, Waiting line FIFO and LIFO with examples. Customer's behavior in queue. M/M/I System and its details. Brief study about CPM and PERT	10 Hrs	L1, L2, L3, L4

MODULE 5: Sequencing. Meaning of sequencing and assumptions made in sequencing problems. Types of Sequencing models such as n jobs on two machines and n jobs on three machines. Determination of Optimal sequence and calculation of Total Elapsed Time (TET)	10 Hrs	L2, L3
COURSE OUTCOMES: On completion of this course, Students will be able to 1. Learn the various models of operation research technique 2. Gain knowledge about the phases and formulation 3. Will be able to understand the application of this scientific tool		
Graduate Attributes (as per NBA) <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module

ENVIRONMENTAL MANAGEMENT IN TEXTILE INDUSTRY [As Per Choice Based Credit System (CBCS) Scheme] SEMESTER - VI			
Subject Code	15TX652	IA Marks	20

Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
The objective of this course is to make students understand environmental management aspects in textile industries. This course enable the students to understand the significance of pollution control measures, quality of water and effluent treatment methods.			
MODULES		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Introduction to Environment Management. Scope and objectives, Benefits. Quality of Water. Water quality requirements for textile wet processing.		10Hrs	L1, L2
MODULE 2: SEWAGE- DEFINITION- characteristics of sewage, general methods of treatment of sewage, disposal of sewage. INDUSTRIAL EFFLUENTS: The disposal of industrial effluents in to streams. Characteristics of textilemill effluents, disposal and effect on the receiving streams.		10Hrs	L1, L2
MODULE 3: Noise pollution, causes of noise pollution, effects of noise pollution, remedial measures. Methods of noise control in textile mills. Brief discussion about different instruments used in analysis of effluents.		10Hrs	L1, L2, L3
MODULE 4: Brief discussion about different instruments used in analysis of effluents. Sources of pollution and its control. Various methods of industrial waste water treatment. Treatment of effluents received from textile wet processing industries.		10Hrs	L1, L2, L3, L4

<p>MODULE 5: Filtration and filtration methods. Role of filter fabrics in pollution control. Indian pollution acts, their role and effectiveness. Recent developments in pollution control in various processes in textile mills and manufacturing plants.</p>	<p>10Hrs</p>	<p>L2, L3</p>
<p>COURSE OUTCOMES:</p> <ol style="list-style-type: none"> 1. This subject helps the student to acquire the concepts of environmental management for textile industries. 2. This subject prepares the student apply environmental concept tools, pollution control norms and effluent control measures in textile/garment manufacturing industries 3. Students are exposed to environmental laws, EA systems, effluent treatment methods and concepts so that they apply these concepts in the actual work environment for maximum benefits. 		
<p>Graduate Attributes (as per NBA)</p> <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
<p>Scheme of Examination / Question paper pattern</p> <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module

NON-WOVEN TECHNOLOGY

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VI

Subject Code	15TX653	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

CREDITS - 04

COURSE OBJECTIVES :

The objective of this Course is to make students understand the basics of nonwoven fabrics and various methods of manufacturing nonwoven fabrics and their uses and applications in various fields.

Modules	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Introduction to non-woven fabrics, comparison with other fabric forming methods, Classification of non-woven (various approaches). Fibres used in non-wovens and their Characteristic features and properties of fibres.	08 Hrs	L1, L2
MODULE 2: MANUFACTURE OF NON-WOVENS: Dry methods- various methods of web preparation (opening, blending and cleaning machines used) technology used in production of parallel, cross-laid and random laid webs, web laying, machines. WET METHODS: principles and raw materials, web laying, concept of drift deposition.	10 Hrs	L1, L2
MODULE 3: Various methods of bonding web: Mechanical bonding introduction to needle punching, passage of material through needle loom, types of looms – The felting loom, Structuring loom, Random velour loom, Components of needle, needle action, Barb and its important parts kick-up, spacing, angle and depth, needle board arrangement of needle boards. Hydro-entanglement process and spun lace methods. Fabric structure and properties, uses and applications of needled fabrics. Stitch bonding. Thermal bonding: Principles of thermal bonding, types of binders and binder fibres , binding powder, binding web, Methods of thermal bonding: Hot calendaring, belt	10Hrs	L1, L2, L3

calendaring, Through air thermal bonding, infrared bonding, Ultrasonic bonding, spun bonding, melt blown processes.		
MODULE 4: Chemical bonding: Introduction, properties desired in binder, bonding agents and their application, bonding mechanisms, factors influencing the process, conditions for providing necessary adhesions, various method of adhesive bonding. Saturation bonding, Foam bonding, Spray bonding, print bonding, powder bonding. FINISHING OF NON-WOVENS: Methods, dyeing and, printing, coating, lamination and special finishing techniques.	10Hrs	L1, L2, L3, L4
MODULE 5: Non-woven fabric properties, testing of non-wovens. APPLICATION OF NON-WOVENS: A detailed study of application on non-wovens in medical field, home applications, shoes and leather industries, electrical industry. Applications as technical textiles in automobiles etc.	10 Hrs	L2, L3, L4
COURSE OUTCOMES: On completion of this course, Students will be able to 1. Learn the various methods of manufacturing nonwoven fabrics 2. Gain knowledge about the machinery and Process Parameters of nonwoven fabrics. 3. Will be able to understand the wide applications of nonwoven fabrics.		
Graduate Attributes (as per NBA) <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of Sixteen marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		
Text Books: <ol style="list-style-type: none"> 1. Non woven- Radkocroma, Textile Trade Press, Manchester, 1971. 2. Non woven bonded fabrics- J.Lunenscoloss, et al, Ellis Hotwood, London, 1985. 3. PROCESS CONTROL IN WEAVING

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VI

Subject Code	15TX654	IA Marks	20
Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

CREDITS - 04

COURSE OBJECTIVES :

The objective of this Course is to make students understand the basic concepts of process control techniques to apply them in weaving mills. They will be made to analyse and apply these process control tools in weaving production lines to maximize the productivity and profitability

MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Scope for process Control, Systems of process Control in Weaving, Setting norms and schedule of checks, machinery audit, Quality Control in weaving – Yarn quality requirements for shuttle and shuttleless looms – Quality and performance in winding, warping, pirn winding, sizing and beam gaiting.	10Hrs	L1, L2
MODULE 2: Process Control in weaving, – weaving package defects, causes and remedies – choice of size recipe – selection of weaving accessories – Quality studies and norms. Control of hard waste optimizing quality of preparation. Control of quality of knots, producing good package, control of productivity.	10Hrs	L1, L2
MODULE 3: Process Control in weaving, – weaving package defects, causes and remedies – choice of size recipe – selection of weaving accessories – Quality studies and norms. Control of hard waste optimizing quality of preparation.	10 Hrs	L1, L2, L3

Control of quality of knots, producing good package, control of productivity.		
MODULE 4: Care in use and Selection of healds, Care in use and selections of Reads, Care in dressing of the beams for reducing incidence of cross ends, Fabric defects-causes-control measures. Inspection standards – cloth realization – value loss. Snap study in loom shed.	10 Hrs	L1, L2, L3, L4
MODULE 5: Process performance studies and norms. Ambient conditions in weaving. Factors affecting productivity in weaving – productivity indices – Loom efficiency: factors influencing loom efficiency – maximizing production and productivity in weaving, Establishment of productivity indices.	10 Hrs	L2, L3
COURSE OUTCOMES:		
<ol style="list-style-type: none"> 1. This subject helps the student to acquire the concepts of process control aspects of weaving. 2. This subject prepares the student apply process control tools to understand the weaving technology 3. Students are exposed to process control tools and techniques so that they apply these concepts in the actual work environment for maximum benefits. 		
Graduate Attributes (as per NBA)		
<ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern		
<ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		
Textbooks		
<ol style="list-style-type: none"> 1. A System of Process Control in Weaving, ATIRA, Ahmedabad, 1983. 2. M. C. Paliwal and P. D. Kimothi, Process Control in Weaving, ATIRA Publication, Ahmedabad, 1983.

TEXTILE TESTING LAB - I

[As per Choice Based Credit System (CBCS) scheme]

SEMESTER – VI

Laboratory Code	15TXL66	IA Marks	20
Number of Lecture Hours/Week	01Hr Tutorial (Instructions) + 02 Hours Laboratory	Exam Marks	80
		Exam Hours	03

CREDITS – 02

Course objectives:

The students are to learn the testing of various fibres and yarns for their various quality parameters. To learn operating instruments, settings, calibration, tabulation of test data, calculations, analysis of test results and draw conclusions.

Laboratory Experiments:

NOTE: The experiments are to be carried using discrete components only.

Revised Bloom's Taxonomy (RBT) Level

Fibre Tests:

1. Identification of textile fibres by using microscope.
2. Identification of textile fibres by burning and chemical tests
3. Determination of cotton fibre maturity by Caustic method.
4. Determination of fibre length parameters by Baersorter
5. Determination of fibre fineness by Air-flow method.
6. Determination of fibre strength using Stelometer.
7. Blend analysis by chemical methods.
8. Determination of moisture content and regain of textile materials.

L5, L6

L2, L3, L4

L5, L6

L2, L3, L4

L5, L6

L2, L3, L4

L2, L3, L4

Yarn Tests:

1. Determination of yarn count
2. Determination of single and ply yarn twist.
3. Determination of lea strength and CSP.
4. Determination of single yarn strength, elongation and RKM calculations.

L5, L6

L5, L6

L5, L6

L2, L3, L4

5. Determination of tensile strength of sewing threads.	L5, L6
6. Determination of yarn count, no. of twists, yarn ply and sewability of sewing threads.	L5, L6
Course outcomes:	
<ol style="list-style-type: none"> 1. Students are able to understand quality of fibres and yarns. 2. Students are able to test the materials using instruments and methods. 3. Students are able to tabulate the test results and learn calculations involved. 4. Students are able to analyse the test results and draw conclusions 	
Graduate Attributes (as per NBA)	
<ol style="list-style-type: none"> 1. Engineering Knowledge related testing of fibres and yarns. 2. Problem Analysis related quality of fibres and yarns. 3. Design/Development of solutions for better evaluation of quality of textiles. 	
Conduct of Practical Examination:	
<ol style="list-style-type: none"> 1. All laboratory experiments are to be included for practical examination. 2. Students are allowed to pick one experiment from the lot. 3. Strictly follow the instructions as printed on the cover page of answer script for breakup of marks. 4. Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero. 	

FASHION DESIGN AND GARMENT MANUFACTURE LAB			
[As per Choice Based Credit System (CBCS) scheme]			
SEMESTER – VI			
Laboratory Code	15TXL67	IA Marks	20
Number of Lecture Hours/Week	01Hr Tutorial (Instructions) + 02 Hours Laboratory	Exam Marks	80
		Exam Hours	03
CREDITS – 02			
Course objectives:			
Study about various sewing machines and tools and equipment used for measuring, marking and cutting for making a garment, and learn about accessories used in garment industry.			
Laboratory Experiments:			Revised Bloom's Taxonomy (RBT) Level
NOTE: The experiments are to be carried using discrete components only.			
1. Introduction to Sewing machine.			L1, L2
2. Study of different types sewing machines			L1, L2, L3

3. Study of basic components of sewing machine.	L2, L3,
4. Study of different type's stitches and seams.	L3, L4
5. Study of tools and equipment used	L1, L2
6. Study of rule of proportions (Human body and Head Theory)	L1, L2,
7. Types of measurements. Techniques of body measurements.	L3, L4
8. How to take body measurements. Study of various buttons, labels and decorative materials for their characteristics and applications.	L2, L3, L4
9. Study of various buttons, labels and decorative materials for their characteristics and applications.	L2, L3
10. Practice of making a pattern of Bermuda and stitching	L4, L5, L6
11. Practice of making a pattern of men's shirt and stitching	L5, L6
12. Practice of making a pattern of salwar kameez and stitching	L5, L6
13. Practice of making a pattern of kids wear and stitching	L5, L6
14. Study and Practice of computer aided marker preparation for Men's, Women's and Children's Wear.	L6
Course outcomes: <ul style="list-style-type: none"> • Students are able to understand the principle of working of different types sewing machines used in Industry. • Students will learn how to take body measurement and draft the pattern and cutting. • Students will learn the stitches, seams used to join the cut parts of garment. • Students will learn to make individual patterns of men, women and kids garment. 	
Graduate Attributes (as per NBA) <ul style="list-style-type: none"> • Engineering Knowledge. • Problem Analysis. • Design/Development of solutions. 	
Conduct of Practical Examination: <ol style="list-style-type: none"> 1. All laboratory experiments are to be included for practical examination. 2. Students are allowed to pick one experiment from the lot. 3. Strictly follow the instructions as printed on the cover page of answer script for breakup of marks. 4. Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero. 	

FABRIC STRUCTURE AND DESIGN LAB - I

[As per Choice Based Credit System (CBCS) scheme]

SEMESTER – VI

Laboratory Code	15TXL68	IA Marks	20
Number of Lecture Hours/Week	01Hr Tutorial (Instructions) + 02 Hours Laboratory	Exam Marks	80
		Exam Hours	03

CREDITS – 02

Course objectives:

To learn analysis of fabrics and know their construction and manufacturing details. To know various design features and their aesthetic values. To understand the manufacturing requirements of fabrics with various basic designs. To understand the use of colours and colour combinations in the production of fabric designs.

Laboratory Experiments:

NOTE: The experiments are to be carried using discrete components only.

Revised Bloom's Taxonomy (RBT) Level

1. Analysis of Plain wave fabrics	L5, L6
2. Analysis of Twill weave fabrics	L2, L3, L4
3. Analysis of Honey comb weave fabrics	L2, L3, L4
4. Analysis of Huck back weave fabrics	L5, L6
5. Analysis of Mock leno weave and other toweling fabrics	L5, L6
6. Analysis of Satin weave fabrics	L2, L3, L4
7. Analysis of Sateen weave fabrics	L5, L6
8. Creation of stripes and checks effect on paper using suitable colours	L2, L3, L4
9. Creation of floral design on paper by suitable colours	L5, L6
10. Creation of animation patterns and other designs on paper by suitable colours	L5, L6
11. Creation of suitable designs on dobby looms	L5, L6
12. Creation of suitable designs on jacquard	L4, L5, L6

Course outcomes:

Students learn the analysis of fabrics for construction details

Students to learn the analysis of manufacturing details

Students know the design features and production aspects

Graduate Attributes (as per NBA)

- Engineering Knowledge to design the fabrics.
- Problem Analysis.
- Design/Development of solutions.

Conduct of Practical Examination:

1. All laboratory experiments are to be included for practical examination.
2. Students are allowed to pick one experiment from the lot.
3. Strictly follow the instructions as printed on the cover page of answer script for breakup of marks.
4. Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero.

SEMESTER – VII**STRUCTURE AND PROPERTIES OF SILK**

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VII

Subject Code	15ST71	IA Marks	20
Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
The main objective of this course is to make students understand the basic concepts of structure of silk fibres and properties. The objectives include, understanding of physical and chemical structure of silk fibres and various physical, mechanical and other properties of silk fibres in detail.			
MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level	
MODULE 1: Introduction to structure of silk. Composition of silk - amino acid composition, microstructure and appearance, Longitudinal and cross-sectional views, density and moisture regain of silk.	10 Hrs	L1, L2	
MODULE 2: Microstructure of silk-Crystal Structure, crystallinity, orientation, crystal size, birefringence, sonic modulus. X-ray studies, IR Spectroscopy studies on silk and their importance.	10 Hrs	L1, L2	
MODULE 3: Introduction to Properties of silk. Tensile properties – Stress-strain characteristics, visco-elastic behavior, creep and stress-relaxation, inverse stress-relaxation.	10Hrs	L1, L2, L3	
MODULE 4: Dynamic mechanical behavior. Thermal properties - DSC, DTA and TGA studies on silk. Optical Properties of silkworm silk. Introduction to Spider silks and their applications: Types of spider silk, chemical compositions, general properties, tensile properties and application of spider silk.	10Hrs	L1, L2, L3, L4	
MODULE 5: Dyeing and Finishing of silk fibre fabrics: Types of dyes used, factors affecting dyeing behavior of silk and preparation silk for dyeing. Recent developments in degumming, bleaching and dyeing. Dyeing of silk with reactive, direct and natural dyes. Finishing of silk fabrics: Types and methods modern technologies involved to impart wrinkle resistant finish, stain repellent, anti – microbial finish and other	10Hrs	L2, L3, L4	

specialty finishes applicable to silk and its blends.		
---	--	--

COURSE OUTCOMES:

1. This subject helps the student to acquire the concepts structure and properties of silk fibres.
2. This subject prepares the student to understand and analyse various properties of silk fibres for suitable applications in industry.
3. Students are exposed to various structural behavior, properties and dyeing behavior of silk fibres with a knowledge of spiders silk and its applications.

Graduate Attributes (as per NBA)

- Engineering Knowledge
- Problem Analysis
- Design/development of solutions (partly)
- Interpretation of data

Scheme of Examination / Question paper pattern

- Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module.
- Students have to answer five full questions choosing one full question from each module

TEXT BOOKS

1. Silk-Processing, properties and Applications, K.MurugeshaBabu, Woodhead Publishing Limited, Cambridge, 2013.
2. F.A.O Publication silk manual.
3. Hand book of silk Technology – T.N. Sonwalkar, New Age International (P) Limited, Publishers, New Delhi, 2001
4. “Silk Wet Processing” - Dr. M. L. Gulrajani, IIT Publication.
5. “Silk Dyeing” - Dr. V. A. Shenai, Sewak Publications.
6. “Silk Dyeing, Printing and Finishing” – G H Hurst, Summer Press Publications

REFERENCE BOOKS:

1. Handbook of Sericulture Technologies, S.B.Dandin, Central Silk Board, 2003
2. Silk Reeling and Testing Manual - FAO

TEXTILE TESTING - II

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VII

Subject Code	15TX72	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
<p>The objective of this course is to make students understand the importance of textile testing and quality control in textile industry. Students are trained to understand various methods and instruments used for testing of yarns, fabrics, garments and other accessories. Students are trained to test the yarns, fabrics, garments and other accessories for various properties, and calculate, analyse, compare and draw suitable conclusions.</p>			
Modules		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Evenness of various textile strands such as sliver, roving & yarns – random variation, periodic variation, Index of irregularity, Variance- length curves and their importance, Methods of measurement of evenness, principles of various evenness testers & measurement of evenness. Mass variation diagram & spectrogram & its importance. Causes & effects of irregularity in textile strands. Yarn hairiness and its measurements.		10Hrs	L1, L2
MODULE 2: Determination of fabric length, width, thickness, weight, thread density, and crimp. Determination of flammability, air permeability, and Thermal conductivity. Determination of fabric tensile, tearing and bursting strength. .		10Hrs	L1, L2
MODULE 3: Determination of stiffness, crease, drape, serviceability, wear, abrasion resistance and Pilling resistance.		10 Hrs	L1, L2, L3
MODULE 4: Water & fabric relationship. Study of water penetration, shrinkage test, wetting of apparels & industrial fabrics. Penetration of fabrics by water under pressure.		10 Hrs	L1, L2, L3, L4

<p>MODULE 5: Fabric inspection - Assessment of fabric quality by fabric inspection, different methods of inspection and acceptance criteria. Study of fabric cyclic properties like bending, shear, fatigue. Estimation of color fastness of dyed fabrics.</p>	<p>10 Hrs</p>	<p>L2, L3</p>
<p>COURSE OUTCOMES: On completion of this course, Students will be able to</p> <ol style="list-style-type: none"> 1. Test yarns, fabrics and other accessories 2. Understand the methods and principles involved in testing 3. Use Instruments and understand their principle of working 4. Understand the quality parameters of textile materials 5. Tabulate test results, analyse and compare 		
<p>Graduate Attributes (as per NBA)</p> <ol style="list-style-type: none"> 1. Engineering knowledge related to quality 2. Understanding quality 3. Analysis of quality problems 4. Design/development of solutions 5. Interpretation of test data 		
<p>Scheme of Examination / Question paper pattern</p> <ol style="list-style-type: none"> 1. Two full questions (with a maximum of four sub questions) of sixteen marks each to be set from each module. Each question should cover all contents of the respective module. 2. Students have to answer five full questions choosing one full question from each module 		
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Principles of Textile Testing, Booth J. E., Butterworth, Wendon III Edition. 2. SILK REELING TECHNOLOGY			
[As Per Choice Based Credit System (CBCS) Scheme]			
SEMESTER - VII			
Subject Code	15ST73	IA Marks	20
Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
The objective of this course is to make students understand the basic concepts of silk reeling technology. This will enable them to study preparatory processes prior to silk reeling. The course will help the students to understand detailed methods of silk reeling and post reeling operations.			
MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level	
MODULE 1: Introduction to silk reeling. Importance of cocoon quality, factors influencing quality of cocoon, Cocoon characteristics and their significance in silk reeling. Pretreatment of cocoons: Stifling of cocoons-Objects, various methods, merits and de-merits. Cocoon storage, cocoon mixing, deflossing, riddling and cocoon sorting	10 Hrs	L1, L2	
MODULE 2: Cocoon cooking – Objects, various methods such as open pan, three-pan, conveyor cooking etc. – merits and demerits. Cocoon cooking for floating and sunken systems of reeling.	10 Hrs	L1, L2	
MODULE 3: Silk Reeling - Factors influencing silk reeling, Overview of silk reeling machinery & processes. Silk reeling machines: Salient features, passage of material and production aspects of country charka, cottage basin, multi-end filature, semi-automatic and automatic reeling machines. Silk Re-reeling, Skein finishing & packing. Recent developments in reeling of silk.	10Hrs	L1, L2, L3	
MODULE 4: Silk Throwing – objects and importance. Sequence of operations in silk throwing - winding,	10 Hrs	L1, L2, L3, L4	

doubling, re-winding and twisting. Manufacture of yarns for use in ordinary, chiffon, crepe, Georgette fabrics. Recent developments in silk throwing machinery.		
MODULE 5: Quality Control in Reeling: characteristics of water, treatment methods for water for reeling. Water quality in reeling clusters. Raw silk testing & grading – National & International methods of testing & grading of raw silk. Estimation of shell ratio, renditta, reelability, raw silk percentage and their importance.	10Hrs	L2, L3, L4
COURSE OUTCOMES:		
<ol style="list-style-type: none"> 1. This subject helps the student to acquire the concepts of silk reeling and preparatory processes prior to silk reeling. 2. This subject prepares the student to understand and practice silk reeling as a small scale activity. 3. Students are exposed to various methods of silk reeling, post reeling processes, quality aspects of silk so as to enable them to start a small scale silk reeling industry. 		
Graduate Attributes (as per NBA)

STATISTICAL APPLICATIONS TO TEXTILES

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VII

Subject Code	15TX741	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03

CREDITS - 03

COURSE OBJECTIVES :

This Course aims at updating knowledge of students in following fields of statistical quality control

1. Concepts of statistics and quality control
2. Analyse the data, use suitable statistical tool to draw suitable conclusions
3. Comparing different processes, parameters etc for quality control

MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
<p>MODULE 1: The concept of individual population and samples-Frequency distribution and its representation-Construction of frequency diagrams with applications, probability curves. Statistical measures and their practical applications. Measures of central tendency-different types of means, Measures of dispersion. Skewness, kurtosis</p>	08Hrs	L1, L2
<p>MODULE 2: Random sampling errors, relations between samples and populations, confidence interval. Determination CI for means, SD and difference in mean and SD. The normal distribution, binomial and Poisson distributions.</p>	08Hrs	L1, L2
<p>MODULE 3: Control charts, their uses and limitations in control of quality, concept of control limits, specification limits, \bar{X}R, P, nP and C chart. Time series, setting up of trend line, components of time series trend line by straight line quadratic and exponential method.</p>	08Hrs	L1, L2, L3
<p>MODULE 4: Test of significance. Setting up of hypothesis. Significant tests for means and dispersions, chi- square test.</p>	08Hrs	L1, L2, L3, L4

MODULE 5: Analysis of variance-One way & two way. Correlation and Correlation co- efficient. Regression Analysis	08Hrs	L2, L3
COURSE OUTCOMES:		
<ol style="list-style-type: none"> 1. This course work prepares students to work in quality control department of spinning, weaving and garment manufacturing 2. This course work prepares students to analyze the data during their project work and case studies. 		
Graduate Attributes (as per NBA)

FINANCIAL MANAGEMENT			
[As Per Choice Based Credit System (CBCS) Scheme]			
SEMESTER - VII			
Subject Code	15TX742	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
CREDITS - 03			
COURSE OBJECTIVES :			
<ol style="list-style-type: none"> 1. To familiarize the students with basic concepts of financial management. 2. To understand time value of money and cost of capital. 3. To analyze capital structure, capital budgeting and dividend decision. 4. To understand the short term and long term financing and working capital management 			

MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
<p>MODULE 1: Finance function, goals of finance management, Financial planning, and Major financial decision areas. Sources of Financing: Shares, Debentures, Term loans, Lease financing, Hybrid financing, Venture Capital, Angel investing and private equity, Warrants and convertibles (Theory Only) Capital structure: measure of leverage, effects of lever - I, traditional approaches, MM theory offinancial leverage and value of the forms. Designing of capital structure- EBIT- EPS analysis, risk-return trade-off.</p>	08Hrs	L1, L2
<p>MODULE 2: Investment decisions– Capital budgeting process, Investment evaluation techniques – Net present value, Internal rate of return, Modified internal rate of return, Profitability index, Payback period, discounted payback period, accounting rate of return.</p>	08Hrs	L1, L2
<p>MODULE 3: Capital structure: measure of leverage, effects of lever- I, traditional approaches, MM theory offinancial leverage and value of the forms. Designing of capital structure- EBIT- EPS analysis, risk-return trade-off. Dividend policy: Factors affecting dividend policy relevance of the dividend policy- Walters model, Gordon's model- M.M. theory, and types of dividend policies- Bonus shares - corporate dividend policy in practice.</p>	08Hrs	L1, L2, L3
<p>MODULE 4: Market for corporate securities, trading procedures in stock exchange, financial services, leasing, mutual funds, SEBI and market regulation. Working capital management, receivables, inventories and cash management, Merger and take-overs. Objects of costing-elements of costs, types of overheads, Allocation of factory over heads, Methods-determination of selling price. Definition and objects of depreciation-break-even analysis.</p>	08Hrs	L1, L2, L3, L4

<p>MODULE 5: Definition and Advantages of Cost Accounting. Elements of cost. Introduction, classification, elements and allocation of Material cost. Labor cost and overhead cost. Process cost calculation- introduction, special features of Textile processing and its cost calculation. Introduction to standard costing and Budgetary control. Statutory guidelines on the maintenance of cost records.</p>	<p>08Hrs</p>	<p>L2, L3</p>
<p>COURSE OUTCOMES:</p> <ol style="list-style-type: none"> 1. Understand the basic financial concepts 2. Apply time value of money 3. Evaluate the investment decisions 4. Analyze the capital structure and dividend decisions. 5. Estimate working capital requirements 		
<p>Graduate Attributes (as per NBA)</p> <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
<p>Scheme of Examination / Question paper pattern</p> <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Financial Management, Khan M. Y & Jain P. K, 6/e, TMH, 2011. 2. CAD/CAM IN TEXTILES

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VII

Subject Code	15TX743	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03

CREDITS - 03

COURSE OBJECTIVES :

The objective of this Course is to make students understand the use of computers and software packages for the development and production of various textiles materials, fabrics and garments. To understand various possibilities of use of computer software for the development of fabric designs and garment designs. Students to learn the use of computers and software packages for the development of garment designing and fashion designing.

Modules	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Introduction to computer - concepts of CAD / CAM. CAM in Garment Manufacturing. Complete pattern design system in preparation for grading, marker making and pattern manipulation. Computerized production pattern making - Hardware, software and system programming to produce a sample production pattern. Computer aided manipulation of pattern pieces to create individual styles.	08Hrs	L1, L2
MODULE 2: Operation of garment CAD software. Computer used for purchase, inventory control and sales, computerization in quality control and production control.	08Hrs	L1, L2
MODULE 3: Introduction to finite scheduling concept and fast react software. Creating product and order planning, updating. Eliminate late deliveries - General set up, allowances and matrices - Analyzing line balancing in different departments - control mechanisms - critical path and time tables.	08Hrs	L1, L2, L3
MODULE 4: Computer controlled machinery for garment manufacturing - automated layout planning by various techniques. Algorithm for computer production garment parts -	08 Hrs	L1, L2, L3, L4

intelligent systems - 3D scanning technology.		
MODULE 5: Use of microcomputers for production control in garment industry. Imaging techniques for various designs. Development of robotics for CAM. EDI in garment technology. Concept of Enterprise Resource Planning (ERP) and computerization in exports /documentation.	08Hrs	L2, L3
COURSE OUTCOMES: On completion of this course, Students will be able to: <ol style="list-style-type: none"> 1. Learn the modern aspects of production of textiles 2. Explore the application of microprocessors and computers in textile manufacturing 3. Development of various fabrics designs by using computers and software 4. Calculations regarding raw material requirements, equipment and production planning etc. 5. Application of computers for colour measurement and to determine dye recipe. 		
Graduate Attributes (as per NBA) <ol style="list-style-type: none"> 1. Engineering Knowledge and computer application in textile designing and production. 2. Production/design problems analysis by computers and software. 3. Design/development of Computer aided design. 4. Interpretation of construction, design particulars. 		
Scheme of Examination / Question paper pattern <ol style="list-style-type: none"> 1. Two full questions (with a maximum of four sub questions) of sixteen marks each to be set from each module. Each question should cover all contents of the respective module. 2. Students have to answer five full questions choosing one full question from each module 		
Text Books: <ol style="list-style-type: none"> 1. Stephen Gray " CAD / CAM in clothing and Textiles ", Gower Publishing Limited, 1998, 2. Compilation of papers presented at the Annual world conference Sep 26 -29, 1984 Hong Kong, " Computers in the world of textiles ", The Textile Institute, Manchester 3. W. Aldrich, "CAD in clothing and Textiles", Blackwell Science 2nd edition, 1992.

SMART TEXTILES

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VII			
Subject Code	15TX744	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
CREDITS - 03			
COURSE OBJECTIVES :			
<ol style="list-style-type: none"> 1. Recall and Recognize smart technology for textiles and clothing. 2. Recognize and demonstrate the intelligent systems of incorporating the sensor, processor and the actuator into textiles. 3. Define, Recognize and demonstrate PCMs and their properties and uses. 4. Recognize and apply and analyze the functions and applications of smart textiles. 			
MODULES		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Smart technology for textiles and clothing – Introduction and Overview, development of smart technology for textiles and clothing – sensors/actuators, for signal transmission, processing and controls. Electrically active polymer materials – concepts of autonomic systems and materials, polymer materials as actuators or artificial muscle, peculiarity of polymer gel actuator, triggers for actuating polymer gels, electro-active polymer gels as artificial muscles, from electro-active polymer gel to electro-active elastomer with large deformation.		08Hrs	L1, L2
MODULE 2: Introduction to phase change materials – Heat balance and thermo-physiological comfort, phase change technology, PCMs in textiles, textile treatment with PCM microcapsules, thermal performance, test methods, applications, future prospects of PCM in textiles and clothing. Intelligent textiles with PCMs – Basic information on PCMs, phase change properties of linear alkyl hydrocarbons, textiles containing PCM, Functions of Textile Structure with PCM.		08Hrs	L1, L2
MODULE 3: Mode of PCM performance in clothing, Manufacturing of textiles containing micro PCMs, Applications of textiles containing PCMs are Domestic textiles, Medical		08Hrs	L1, L2, L3

<p>products, Automotive textiles, Air conditioning buildings with PCMs.</p> <p>Tailor made intelligent polymers for biomedical applications- Introduction, Fundamentals aspects of shape memory materials, concepts of biodegradable shape memory polymers, degradable thermoplastics elastomers having shape memory properties, degradable polymer networks having shape memory properties.</p>		
<p>MODULE 4:</p> <p>Embroidery and Smart textiles – Introduction, basics of embroidery technology – combined embroidery techniques,</p> <p>Embroidery machines, Embroidery for technical applications – tailored fibre placement, Embroidery technology used for medical textiles. Embroidered stamp – gag or innovation.</p> <p>Adaptive and responsive textile structures – Introduction, textiles and computing – the symbiotic relationship, the three dimensions of clothing and wearable information infrastructure, textiles and information processing, Georgia tech wearable motherboard,</p>	08Hrs	L1, L2, L3, L4
<p>MODULE 5:</p> <p>Wearable technology for snow clothing. Bioprocessing for smart textiles and clothing - treatment of wool with enzymes, treatment of cotton with enzymes, enzymatic modification of synthetic fibres, spider silk, intelligent fibres.</p> <p>Textile scaffolds in tissue engineering – ideal scaffold system, scaffold materials, textile scaffolds.</p>	08Hrs	L2, L3,L4
<p>COURSE OUTCOMES:</p> <p>On completion of this course, Students will be able to</p> <ol style="list-style-type: none"> 1. Learn the various aspects of smart and intelligent textiles. 2. Gain knowledge about the incorporation of smart elements in textile substrates. 3. Will be able to take up project and research work in emerging areas smart textile. 		
<p>Graduate Attributes (as per NBA)</p> <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
<p>Scheme of Examination / Question paper pattern</p> <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		

Text Books:

1. Smart fibres, fabrics and clothing, By Xiaoming Tao. Woodhead Publishing Limited, Cambridge, England.
2. Intelligent textiles and clothing, By H.R.Mattila, Woodhead Publishing Limited, Cambridge, England.

References::

1. Wearable electronics and photonics, By Xiaoming Tao, Woodhead Publishing Limited, Cambridge, England.
2. New fibres , By Tatsuya Hongu and Glyn O Phillips, Ellis Horwood, New York, London, Toronto, Sydney, Singapore.

TOTAL QUALITY MANAGEMENT

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VII

Subject Code	15TX751	IA Marks	20
Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03

CREDITS - 03**COURSE OBJECTIVES :**

The objective of this course is to make students understand the concepts of total quality management and its applications in textile and garment industries. This will enable them to study the quality aspects related to textiles and garments and help them obtain maximum benefits by applying TQM concepts in their work environment.

MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Introduction to TQM. Quality movement in Japan, US & India. Definition of quality. Small q & Big Q, Quality characteristics - Views, Dimensions, Determinants. Quality & Profitability. PRINCIPLES OF TOTAL QUALITY, Evolution of total quality and control. TQM - Basic concepts & overview. Necessity of TQM.Elements of TQM, benefits of TQM, TQM in services, ISO 9000 & ISO 14000 in quality management system	08Hrs	L1, L2
MODULE 2: QUALITY & MANAGEMENT PHILOSOPHIES - Deming Philosophy-Chain reaction, 14 points for management, triangle theory of variance, deadly	08Hrs	L1, L2

<p>diseases & sins, Deming's wheel.</p> <p>Juran's Philosophy - 10 steps for quality improvement, quality trilogy, universal breakthrough sequence.</p> <p>Crosby Philosophy-Crosby's 6 C's, Absolutes of quality, Crosby's 14 points for quality, Crosby triangle.</p> <p>Comparison of 3 major quality philosophies.</p>		
<p>MODULE 3:</p> <p>MANAGING QUALITY- traditional Vs Modern quality management, the quality planning, road map, the quality cycle. Cost of quality- Methods to reduce cost of quality, Sampling plans, O.C. curve.</p> <p>QUALITY CONTROL - Objectives of quality control, Strategy & policy. Company wise quality control. Quality Assurance- Definition, concepts & objectives. Economic models for quality assurance. Statistical methodology in quality assurance. Process capability ratio, 6 sigma in quality assurance.</p>	08Hrs	L1, L2, L3
<p>MODULE 4:</p> <p>FOCUSSING ON CUSTOMER- Importance of customer satisfaction, Kano's model of customer's satisfaction, customers driven quality cycle, understanding customer's needs & wants, customer's retention.</p> <p>LEADERSHIP- Introduction, characteristics of quality leaders, role of TQM in leadership. Tools & Techniques of TQM, Just in time system-Concepts, objectives, overview, characteristics, benefits. Benchmarking-Introduction, process of bench marking, benefits, advantages & limitations.</p>	08Hrs	L1, L2, L3, L4
<p>MODULE 5:</p> <p>SUPPLY CHAIN MANAGEMENT- Objectives, process tools, supply chain management for manufacturing organization & service organization.</p> <p>World class manufacturing - becoming world class, relevance of TQM in world class manufacturing. World class supplier, world class customer, present global business conditions, world class companies in 21st century.</p>	08Hrs	L2, L3
<p>COURSE OUTCOMES:</p> <ol style="list-style-type: none"> 1. This subject helps the student to acquire the concepts of total quality management tools 2. This subject prepares the student apply TQM concepts in textile/garment manufacturing industries 3. Students are exposed to TQM principles and concepts so that they apply these concepts in the actual work environment for maximum benefits. 		

Graduate Attributes (as per NBA)

- Engineering Knowledge
- Problem Analysis
- Design/development of solutions (partly)
- Interpretation of data

Scheme of Examination / Question paper pattern

- Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module.
- Students have to answer five full questions choosing one full question from each module

1. Total Quality Management- K. Shridhara Bhat Himalaya Publishing House, 2010**References:**

1. **Norms For Spinning-Weaving and Processing**, ATIRA Publication, Ahmedabad 1990
2. **Handbooks manuals** – BIS, ASTM, ISO-9000
3. **Total Quality Management-** N.V.R. Naidu, K.M. Babu, G. Rajendra, New age international publishers

RETAIL MANAGEMENT

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VII

Subject Code	15TX752	IA Marks	20
Nu. Of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03

CREDITS - 03**COURSE OBJECTIVES :**

- To develop an understanding of the contemporary retail management, issues, strategies and trends.
- To highlight the importance of retailing and its role in the success of modern business.
- To acclimatize with the insights of retailing, key activities and relationships

Modules

	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: Introduction and Perspectives on RetailingWorld of Retailing, Retail management, introduction, meaning, characteristics, emergence of organizations of retailing - Types of Retailers (Retail Formats) - Multichannel Retailing - Customer Buying Behaviour, Historical Perspective, role of retailing, trends in retailing, FDI in Retail - Problems of Indian Retailing -	08 Hrs	L1, L2

Current Scenario		
MODULE 2: Marketing: Retailing, Role, Relevance & Trends. Retail Customer, Retail market segmentation & franchising, Relationship marketing in Retailing., Social Marketing in Retail management Strategic management: Retail in India, Services marketing and Management, International/Strategies, Pricing, Advertising & sales promotion.	08 Hrs	L1, L2
MODULE 3: Retailing strategy for Setting up Retail organization and planning: Retail Market Strategy - Financial Strategy - Site & Locations (Size and space allocation, location strategy, factors Affecting the location of Retail, Retail location Research and Techniques, Objectives of Good store Design.) – Human Resource Management, Information Systems and supply chain management & Logistics. Retail Pricing and Promotion: Factors influencing retail pricing, Retail pricing strategies, Retail promotion strategies.	08 Hrs	L1, L2, L3
MODULE 4: Store Management and Visual Merchandising: Store Management: Responsibilities of Store Manager, Store Security, Parking Space Problem at Retail Centers, Store Record and Accounting System, Coding System, Material Handling in Stores, Management of Modern retails –Store Layout, design: Types of Layouts, role of Visual Merchandiser, Visual Merchandising Techniques, Controlling Costs and Reducing Inventories Loss, Exteriors, Interiors Customer Service, Planning Merchandise Assortments -Buying systems-Buying merchandise and Retail Communication Mix.	08 Hrs	L1, L2, L3, L4
MODULE 5: Retail Audit and ethics in Retailing: Undertaking an audit, responding to a retail Audit, problems in conducting a retail audit. Ethics in retailing, social responsibility and consumerism Retail Life Cycle – Innovation / Acceleration / Maturity / Decline, Multi-Channel Retailing.	08 Hrs	L2, L3
COURSE OUTCOMES: <ul style="list-style-type: none"> • Find out the contemporary retail management, issues, and strategies. • Evaluate the recent trends in retailing and its impact in the success of modern 		

<p>business.</p> <ul style="list-style-type: none"> • Relate store management and visual merchandising practices for effective retailing.
<p>Graduate Attributes (as per NBA)</p> <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data
<p>Scheme of Examination / Question paper pattern</p> <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of Sixteen marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Retail Management- A strategic Approach, Alibris, Prentice Hall, Mar., 2006 2. First Steps In A Retail Career, Wrice Mark, Macmillan Publishers Australia P/L 3. Communicating with Customers, Euson, B, Jacaranda Wiley 4. Retail Management, Levy and Weitz, McGraw Hill 5. Retail Management - Chetan Bajaj, Oxford University press 6. Retail Marketing Management - Dravid Gilbert, 2/e, Pearson Education 7. The Art of Retailing - A. J. Lamba, McGraw Hill.
<p>References:</p> <ol style="list-style-type: none"> 1. Marketing Management, R. Saxena 2. Integrated Retail Management - James R. Ogden & Denise Trodden, Biztantra, Latest Edition. 3. Principles of Retail Management - Rosemary Varley, Mohammed Rafiq, Palgrave Macmillan, 2009. 4. Managing Retailing - Sinha, Piyush Kumar & Uniyal & Oxford University Press, 2010. 5. Retailing Management - Swapna Pradhan, 4/e, TMH, 2012. 6. Retail Management: A Strategic Approach - Barry Berman, Joel R. Evans, Pearson. 7. Retail Management, Functional Principles and Practices, Gibson G Vedamani, 4th Edition, JAICO Publishing House

<p>INDUSTRIAL ENGINEERING</p> <p>[As Per Choice Based Credit System (CBCS) Scheme]</p> <p>SEMESTER - VII</p>			
Subject Code	15TX753	IA Marks	20
Nu. Of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<p>CREDITS - 03</p>			
<p>COURSE OBJECTIVES :</p>			

The objective of this course is to understand the importance of Industrial engineers and industrial engineering department in Textile and Garment Industry. This course will enable the students to get familiarized with plant location, layout, work study and time study concepts.

Modules	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
<p>MODULE 1: Importance of Industrial Engineering department in Textile and Garment Industry. Position of Industrial Engineering department in industry. Management, Administration and organization. Professional and scientific management. Difference between management and administration. Study of different types of organization.</p>	08Hrs	L1, L2
<p>MODULE 2: Plant location and Plant layout. Definition of plant location. Factors influencing the plant location. Types of plant location and their advantages and limitations. Plant layout. Definition of Plant layout. Objects of Scientific layout. Principles of Layout. Types of layout and their detailed study</p>	08Hrs	L1, L2
<p>MODULE 3: Work study and its importance definition of work-study. Success of organization through work-study technique. Objects of work study. Problems of work study. Method study and its objects. Steps of method study and detailed study of each step. Determination of new method to complete each activity in industry</p>	08Hrs	L1, L2, L3
<p>MODULE 4: Time study. Definition of Time study and its objects. Detailed study of each steps of Time study. Determination of Normal time, Observed time and Standard time. Study of different types of allowances. Study of Decimal minute stop watch for recording all the activities</p>	08Hrs	L1, L2, L3, L4
<p>MODULE 5: PLANNING AND FORECASTING: Planning and its concept in industry. Detailed study of TEAM work, SMART and POSDCORB and SWOT analysis. Production planning and Control (PPC). Importance of PPC and its detailed study in Industry. Study of Value of money, Inflation and Deflation</p>	08Hrs	L2, L3

currency, Supply and Demand factor and its impact on society		
<p>COURSE OUTCOMES: On completion of this course, Students will be able to:</p> <ol style="list-style-type: none"> 1. Learn the importance of Industrial engineering department 2. Gain knowledge about the position of industrial engineering department 3. Will be able to understand the concept of this scientific tool 		
<p>Graduate Attributes (as per NBA)</p> <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
<p>Scheme of Examination / Question paper pattern</p> <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of sixteen marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		
<p>Text Books:</p> <ol style="list-style-type: none"> 1.R.PaneerSelvam, Production and Operations Management, Prentice Hall of India, 2002. 2. <p>SILK APPAREL MARKETING AND MERCHANDIZING</p> <p>[As Per Choice Based Credit System (CBCS) Scheme]</p> <p>SEMESTER - VII</p>			
Subject Code	15ST754	IA Marks	20

Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
CREDITS - 03			
COURSE OBJECTIVES :			
<p>The objective of this course is to make students understand the basic concepts of silk apparel production methods and their marketing aspects. This will enable them to study silk apparel marketing channels, merchandising concepts, sourcing silk apparels, standards for silk products etc.</p>			
MODULES		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: ORGANIZATION OF THE APPAREL BUSINESS- Nature of Apparel, Organization of the Apparel Industry- Business Concepts Applied to the Apparel Industry- International Issues- Cooperation in Manufacturing and Distribution. Silk: Specialty of Silk products, types, silk made ups.		08Hrs	L1, L2
MODULE 2: MARKETING OBJECTIVES AND STRATEGIES IN SILK INDUSTRY- Functional organization of an apparel firm, responsibilities of marketing division strategic plan, marketing objectives & strategies, Retail and Wholesale Strategies of Silk Merchandise Distribution-Silk Products labeling and licensing.		08Hrs	L1, L2

<p>MODULE 3:</p> <p>MERCHANDISING STRATEGIES FOR SILK PRODUCTS & PROCESSES- Concepts silk apparel production lines, dimensions of product change, nature & timing of merchandising responsibilities, business & marketing plans, line planning, line development line presentation, sourcing.</p> <p>SILK PRODUCTS STANDARDS AND SPECIFICATIONS: Sources of Silk Products and Quality Standards- Standards for Quality, Fit, and Performance- Use of Specifications- Writing Specifications for apparel manufacturing.</p>	<p>08Hrs</p>	<p>L1, L2, L3</p>
<p>MODULE 4:</p> <p>SILK APPAREL DESIGN: Product Development and the Design Function- Role of Product Change in the Design Process- Post adoption Style. Development of Silk Apparel Design Technology.</p> <p>EXPORT MARKETING OF SILK PRODUCTS: Outlook for export marketing, International agreement & agencies for promoting exports. Export import policy. Export assistance. Current pattern of India's foreign & world trade, Export barriers-tariff & non-tariff, Export Assistance.</p>	<p>08Hrs</p>	<p>L1, L2, L3, L4</p>
<p>MODULE 5:</p> <p>Silk Export marketing channels, physical distribution-transportation, packaging & marine insurance for exports.</p> <p>Management of risk & export financing, Quality control & pre-shipment inspection, documents for exports.</p> <p>An Introduction to retail marketing in silk apparels. Consumer behavior & retail operation. The retail marketing mix.</p> <p>Management of a retail brand. Application of IT in silk products retail marketing.</p>	<p>08Hrs</p>	<p>L2, L3, L4</p>

COURSE OUTCOMES:

4. This subject helps the student to acquire the concepts silk apparel production, marketing and merchandising.
5. This subject prepares the student to understand and practice designing of various silk garments and apparels for various purposes.
6. Students are exposed to various standards for silk products, marketing procedures and merchandising methods so as to enable to venture into international business in silk products.

Graduate Attributes (as per NBA)

- Engineering Knowledge
- Problem Analysis
- Design/development of solutions (partly)
- Interpretation of data

Scheme of Examination / Question paper pattern

- Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module.
- Students have to answer five full questions choosing one full question from each module

TEXT BOOKS

1. Handbook of Practical Sericulture – S R Ullal and M. N Narasimhanna, Central Silk Board, 1981
2. F.A.O Publication silk manual.
3. Hand book of silk Technology – T.N. Sonwalkar, New Age International (P) Limited, Publishers, New Delhi, 2001
4. Mulberry silk Reeling Technology – D.Mahadevappa, V.G. Malliyal, D.G. Shankar, RavindraBhandiwad, Oxford and IBH Publishing co. Pvt. Ltd.

REFERENCE BOOKS:

1. Handbook of Sericulture Technologies, S.B.Dandin, Central Silk Board, 2003
2. Silk Reeling and Testing Manual - FAO

TEXTILE TESTING LAB-II

[As per Choice Based Credit System (CBCS) scheme]

SEMESTER – VII

Laboratory Code	15TXL76	IA Marks	20
Number of Lecture Hours/Week	01Hr Tutorial (Instructions) + 02 Hours Laboratory	Exam Marks	80
		Exam Hours	03

CREDITS – 02

Course objectives:

The students are to learn the testing of various yarns and fabrics for their various quality parameters. To learn operating instruments, settings, calibration, tabulation of test data, calculations, analysis of test results and draw conclusions.

Laboratory Experiments:

NOTE: The experiments are to be carried using discrete components only.

**Revised Bloom's
Taxonomy
(RBT) Level**

1. Determination of yarn evenness by visual examination.	L5, L6
2. Determination of evenness of sliver, roving and yarn.	L2, L3, L4
3. Determination of geometrical properties of fabrics.	L2, L3, L4
4. Determination of Air Permeability of fabrics	L5, L6
5. Determination of crease recovery property of fabrics.	L5, L6
6. Determination of drape co-efficient of fabrics.	L2, L3, L4
7. Determination of fabric stiffness and its parameters	L5, L6
8. Determination of fabric strength and elongation.	L2, L3, L4
9. Determination of fabric tearing strength.	L2, L3, L4
10. Determination of fabric bursting strength.	L5, L6
11. Determination of abrasion resistance of fabrics.	
12. Determination of pilling tendency of fabrics.	L5, L6
13. Determination of colour fastness of dyed and printed fabrics for washing	L5, L6
14. Determination of colour fastness of dyed and printed fabrics for perspiration.	L2, L3, L4

15. Determination of dimensional stability of fabrics.	L5, L6
16. Determination of fastness properties of dyed fabric for artificial light and sun light.	L2, L3, L4
17. Determination of Fastness Properties of printed and dyed fabric for rubbing.	L5, L6
Course outcomes:	
<ol style="list-style-type: none"> 1. Students are able to understand quality of fibres and yarns. 2. Students are able to test the materials using instruments and methods. 3. Students are able to tabulate the test results and learn calculations involved. 4. Students are able to analyse the test results and draw conclusions 	
Graduate Attributes (as per NBA)	
<ol style="list-style-type: none"> 1. Engineering Knowledge related testing of yarns and fabrics. 2. Problem Analysis related quality of yarns and fabrics. 3. Design/Development of solutions for better evaluation of quality of textiles. 	
Conduct of Practical Examination:	
<ol style="list-style-type: none"> 1. All laboratory experiments are to be included for practical examination. 2. Students are allowed to pick one experiment from the lot. 3. Strictly follow the instructions as printed on the cover page of answer script for breakup of marks. 4. Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero. 	

SILK REELING TECHNOLOGY LAB			
[As per Choice Based Credit System (CBCS) scheme]			
SEMESTER – VII			
Laboratory Code	15STL77	IA Marks	20
Number of Lecture Hours/Week	01Hr Tutorial (Instructions) + 02 Hours Laboratory	Exam Marks	80
		Exam Hours	03
CREDITS – 02			
COURSE OBJECTIVES:			
To learn the identification of different types of cocoons. Reeling of silk on different machines, testing and grading of silk			
Laboratory Experiments:			Revised Bloom's Taxonomy
NOTE: The experiments are to be carried using discrete components only.			

	(RBT) Level
1. Identification of defective cocoons.	L5, L6
2. Identification of different silk cocoons & sorting of cocoons	L2, L3, L4
3. Measurement of renditta and denier.	L2, L3, L4
4. Measurement of shell ratio.	L5, L6
5. Reeling of silk on silk reeling machine on charka, multi-end reeling machine	L5, L6
6. Rewinding tests on silk winding machine	L2, L3, L4
7. Raw silk testing & grading	L5, L6
8. Twisting of silk on two for one twister.	L2, L3, L4
9. Demonstration of cocoon stifling and reeling of silk automatic filature machine.	L2, L3, L4
10. Testing of silk yams for its quality	L5, L6
Course outcomes:	
<ol style="list-style-type: none"> 1. Students are able to identify different types of cocoons 2. Students to learn the analysis testing and grading of silk 	
Graduate Attributes (as per NBA)	
<ol style="list-style-type: none"> 1. Engineering knowledge. 2. Problem Analysis. 3. Design/Development of solutions. 	
Conduct of Practical Examination:	
<ol style="list-style-type: none"> 1. All laboratory experiments are to be included for practical examination. 2. Students are allowed to pick one experiment from the lot. 3. Strictly follow the instructions as printed on the cover page of answer script for breakup of marks. 4. Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero. 	

SEMESTER – VIII

APPAREL TESTING AND QUALITY CONTROL

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VIII

Subject Code	15TX81	IA Marks	20
Nu. Of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
CREDITS - 04			
COURSE OBJECTIVES :			
<p>The objective of this course is to make students understand the importance of textile testing and quality control in the manufacture of apparels in apparel industry. Students are trained to understand various methods and instruments used for testing/inspection of fabrics, garments and other accessories. Students are to study testing of the yarns, fabrics, garments and other accessories for various properties,</p>			
Modules		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
<p>MODULE 1: Thermal comfort properties, moisture-vapour transmission, liquid-moisture transmission, air-permeability, aesthetic comfort, static electricity. Abrasion resistance, tensile and tearing strength, launder ability, seam – slippage. Seam strength, methods of measurement of seam strength and seam efficiency.</p>		10 Hrs	L1, L2
<p>MODULE 2: Low - stress mechanical properties, formability, tailor ability, sewability etc. Fabric handle by KESF and FAST systems, Fabric handle & application of test results in garment manufacturing. Crease resistance properties, anti - shrink, pilling resistance behavior – role of fibre properties and chemical treatments.</p>		10 Hrs	L1, L2
<p>MODULE 3: Fabric stability and finished width. Fabric inspection methods and acceptance criteria. Laying-up and cutting, basic technology of seams, Stitch forming action, defects in laying, cutting, seaming & sewing operations.</p>		10Hrs	L1, L2, L3
<p>MODULE 4: Colour fastness properties of fabric. Seeing colour and the effect of type of illuminant on the apparent shade of a sample, Effects of intensity, angle of illumination and type</p>		10Hrs	L1, L2, L3, L4

<p>on the apparent shade of a sample, Effects on shade of other colours in adjacent areas.</p> <p>Quality control in the sampling/development department. Examples of garment specification, Seam specification examples, Performance specification.</p>		
<p>MODULE 5:</p> <p>The cost of quality, Functions of Quality Assurance, Commercial advantages form effective control systems, Economic aspects of quality assurance, role of quality control. Dynamic Inspection - Inline, Production & Final Quality Inspection, Product Safety Evaluation, Sampling & Quality Control, Testing & Evaluation - Fast Durability Evaluation, Production & Delivery Monitoring, Platform Quality Inspection Services</p>	10Hrs	L2, L3
<p>COURSE OUTCOMES:</p> <p>On completion of this course, Students will be able to</p> <ol style="list-style-type: none"> 1. Testing of yarns, fabrics and other accessories 2. Method and principle involved in inspection/testing of fabric, zippers, buttons, sewing threads etc. 3. Instruments used and the principle of working 4. Understand the quality parameters of textile materials 		
<p>Graduate Attributes (as per NBA)</p> <ol style="list-style-type: none"> 1. Engineering knowledge related to apparel production 2. Problem analysis, such as design faults, fabric defects etc. 3. Design/development of various types of garments and 4. Interpretation of design of garments to suit particular end use 		
<p>Scheme of Examination / Question paper pattern</p> <ol style="list-style-type: none"> 1. Two full questions (with a maximum of four sub questions) of sixteen marks each to be set from each module. Each question should cover all contents of the respective module. 2. Students have to answer five full questions choosing one full question from each module 		
<p>Text Books:</p> <ol style="list-style-type: none"> 1. “Principles of Textiles testing”, J.E. Booth. 2. “Hand book of textile testing and quality control”, B. Glover, D.S. Hambi-Pu Wiley Eastern.Ltd., Bangalore. 3. “The measurement of Appearance”, Richard S. Hunter and Richard W. Harold, Wiley Inter Science. 4. “An introduction to quality control for the apparel industry”, Pradip. V. Mehta. 		
<p>References:</p> <ol style="list-style-type: none"> 1. “International Apparel Quality manuals”, KES- F and FAST manuals. 2. “Progress in Textile science and technology”, Vol-1, Ed. V.K. Kothari, IAFL, India 2000. 		

TECHNICAL TEXTILES

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VIII

Subject Code	15TX82	IA Marks	20
Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

CREDITS - 04

COURSE OBJECTIVES :

The objective of this Course is to make students understand:

1. Basics of technical textiles
2. Different types of technical textiles
3. Various fibres and fabrics used for production of technical textiles
4. Various applications of technical textiles in industries

MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
MODULE 1: INTRODUCTION TO TECHNICAL TEXTILES. Requirements of fibres, yarns and fabrics for technical textiles. Classification of technical textiles. Study of properties of various fibres used for technical textiles. AGROTECH: Textiles used for agriculture, Horticulture and animal husbandry. MOBIL TECH - AUTOMOTIVE TEXTILES - Use of textiles in tyres, requirements of fibres used for tyres, various fibres used for tyre cords, tire building, different types of tyres. Upholstery in automobiles: vehicle top covers, seat covers, headliners, carpets etc. Safety devices in automobiles: seat belts, airbags, helmets etc. Textiles used in Aerospace industry.	10Hrs	L1, L2
MODULE 2: MEDICAL TEXTILES: Medical application of Textiles, requirements, classification, detailed study of application of textiles in implantable, non-implantable, extra corporal devices and health care hygienic products. GEO TEXTILES: Definition, textile fibres and	10Hrs	L1, L2

fabrics used, functions of geo-textiles. Applications of geotextiles and geomembranes in civil engineering i.e. roads, railways, bridge, dam construction, soil erosion etc.		
MODULE 3: TEXTILES IN FILTRATION: Introduction, types of filtration requirements, filtration mechanisms, Effect of yarns and fabric construction on filtration. Methods/types of filtration. COATED FABRICS: Introduction, chemistry of coated textiles, thermoplastic polymers for coating, coating techniques, fusible interlining.	10Hrs	L1, L2, L3
MODULE 4: SMART TEXTILES: Introduction, concept of smart textiles, various application of smart textiles. Introduction to nanotechnology in textiles. Application of nanotextiles in various field. Production and properties of nanofibres.	10Hrs	L1, L2, L3, L4
MODULE 5: TEXTILES IN DEFENSE: Introduction, historical back ground, criteria for modern military textiles, textiles for environmental protection, Ballistic protective materials, water proof materials, application of textiles in camouflage. Application of Textiles in Packing, Power transmission, fish nets, sports.	10Hrs	L2, L3
COURSE OUTCOMES: <ol style="list-style-type: none"> 7. This subject helps the student to acquire knowledge of various technical textiles used in industries 8. This subject prepares the student work in technical textile manufacturing industry. 9. Students are exposed to research field in technical textiles and their applications in various industries. 		
Graduate Attributes (as per NBA) <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		
TEXT BOOKS: <ol style="list-style-type: none"> 1. Hand book of Technical Textiles- Ed. A.R.Horrocks, S.C, Anand. Wood Head Pub., England, 2000. 		

2. **Hand book of Industrial Textiles-** Ed S. Adanur, Technomic Pub., Lancaster-Basel, 1995.
3. **Smart Fibres - Fabris& Clothing-**Ed. Xiaoming Tao, Wood Head, England, 2001.
4. **Design of Textiles For Industrial-** Applications, ED P.W. Harrison, Pub Textile Institute 1977Manchester

Reference:

FIBRE REINFORCED COMPOSITES

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VIII

Subject Code	15TX831	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03

CREDITS - 03

COURSE OBJECTIVES :

This Course aims at updating knowledge of students in following fields of FRCS.

1. Basic concepts of FRCS, comparison metals and FRCS, various term used in FRCS
2. Different raw materials used for detailed technology of manufacturing FRCS
3. Testing, analysis and detailed application FRCS

Modules	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
<p>MODULE 1: Introduction to composites. Basic nomenclatures – reinforcing phase, continuousphase, matrix, interface etc. Classification of composites with respect to fibre used, matrix used, limitations of engineering metals. Meaning of bio composites, advantages of bio composites. 3D fabrics for composites.</p>	08 Hrs	L1, L2
<p>MODULE 2: Study of mechanical & thermal properties various fibres Viz. Carbon, glass, silicon carbide, boron, kevlar, polyethylene, thiozole etc. used in the production of fibre reinforced composites. Study of major natural fibres (coir, jute) which are used in the production of fibre reinforced composites. Advantages and disadvantages of natural fibres used in composites. Classification of resins, thermoset,</p>	08Hrs	L1, L2

thermoplastic metal matrix and their production properties, advantages, disadvantages (phenolic, epoxy, polyester, vinyl esters)		
MODULE 3: Composites manufacturing techniques-Introduction-Meaning of interphase, types of bond set interphase, meaning of lamina, laminates, and representation of laminates. Prepregtechnology, Hand lay-up-spray-up - filament winding. Compression moulding, injection moulding, poltrusion techniques. Brief outline of mechanical and thermal properties of various composites viz. Glass, boron, carbon, aramid.	08Hrs	L1, L2, L3
MODULE 4: Brief outline on testing of composites - Characterization of physical constituents of composites - composite density, fibre volume fraction, void content. Testing of tensile strength of composites, 3 & 4 point bending of composites, comparison testing of composites. NDT tests of composites. Composite mechanics-failure mechanism in composites. Derivations of various equations related to composite structures viz. Axial modulus, transverse modulus, breaking strength of continuous filament, reinforced composites, effect of volume of fibres on mechanical properties of fibre reinforced composites. Fatigue and creep process in fibre reinforced composites.	08Hrs	L1, L2, L3, L4
MODULE 5: Study of various applications of composites mainly in the field like Aeroplane, aerospace, medical, sports, ship building automobiles and industries.	08Hrs	L2, L3
COURSE OUTCOMES: <ol style="list-style-type: none"> 1. This course prepares students to understand unconventional application textile fibres 2. Students will be able to take up research work in fields of high performance fibres and material science 3. Students can make their career in DRDO, NAL and other defense related areas 		
Graduate Attributes (as per NBA) <ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of Sixteen marks each to be set from each module. Each question should cover all contents of the respective module. 		

- Students have to answer five full questions choosing one full question from each module

NON MULBERRY SILKS AND SILK BYPRODUCT TECHNOLOGY

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VII

Subject Code	15ST832	IA Marks	20
Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03

CREDITS - 03

COURSE OBJECTIVES :

The objective of this course is to make students understand the basic concepts non-mulberry silk rearing and reeling methods to effectively produce various non-mulberry silks. This subject will also enable the students to understand various by-products produced in sericulture and silk industry and their utilization in various fields.

MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
<p>MODULE 1: Scope for non-mulberry silk in India, mulberry Vs. non-mulberry. India's non-mulberry silk potential. TASAR SILK: Prerequisites for expansion tasar silk in India. Verities of tasar silk, morphology, anatomy and tasar cocoon production. Tassar silk reeling technology: reeling machines used, developments in reeling techniques. Applications of tasar silks</p>	08Hrs	L1, L2
<p>MODULE 2: MUGA SILK AND ERI SILK :scope of these silk in Assam & other north eastern states. Morphology, anatomy & rearing methods for Muga and Eri silks.</p>	08Hrs	L1, L2

Muga silk reeling & developments in silk reeling techniques. Eri silk reeling & developments in silk reeling techniques.Applications of Muga and Eri silks.		
MODULE 3: SPIDER SILK: production of spider silk yarn, utilization in spider silk in technical textiles. Properties of spider silks. Applications of spider silks in biomedical applications. Diseases & pests for non-mulberry silk-causes & remedies. Dupion silk: Introduction, reeling and end uses. Noil Yarns: Types, production, uses.	08Hrs	L1, L2, L3
MODULE 4: Introduction to by-products of sericulture and silk industry. Classification of silk waste. Sources & utilization of silk waste – silk worm pupae, basin refuge, cut & pierced cocoons, double cocoons, reeler’s waste. Utilisation of waste cocoons.	08Hrs	L1, L2, L3, L4
MODULE 5: Spun silk manufacturing: Preparatory, spinning, doubling, twisting and finishing processes. Utilization of pupae - drying, oil extraction, application in food products and biofuel production. Marketing & entrepreneurship development in silk by-product industry.	08Hrs	L2, L3, L4
COURSE OUTCOMES:		
<ol style="list-style-type: none"> 1. This subject helps the student to acquire the concepts of rearing of non-mulberry silks and their production in detail. 2. This subject prepares the student to understand and practice production of silk silk yarns, noil yarns and other fancy silk yarns produced from silk waste. 3. Students are exposed to various by-products of sericulture and silk industry and their utilization in various fields. 		
Graduate Attributes (as per NBA)		
<ul style="list-style-type: none"> ➤ Engineering Knowledge ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data 		
Scheme of Examination / Question paper pattern		
<ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module 		
TEXT BOOKS		

1. Handbook of Practical Sericulture – S R Ullal and M. N Narasimhanna, Central Silk Board, 1981
2. F.A.O Publication silk manual.
3. Hand book of silk Technology – T.N. Sonwalkar, New Age International (P) Limited, Publishers, New Delhi, 2001
4. Mulberry silk Reeling Technology – D.Mahadevappa, V.G. Malliyal, D.G. Shankar, Ravindra Bhandiwad, Oxford and IBH Publishing co. Pvt. Ltd.

References:

1. Handbook of Sericulture Technologies, S.B.Dandin, Central Silk Board, 2003
2. Silk Reeling and Testing Manual - FAO

CLOTHING CULTURE AND COMMUNICATION

[As Per Choice Based Credit System (CBCS) Scheme]

SEMESTER - VIII

Subject Code	15TX833	IA Marks	20
No. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03

CREDITS - 03

COURSE OBJECTIVES :

The objective of this Course is to make students understand the basics of clothing culture and its importance and to understand the various costume history of western and Indian civilization and communication through clothing.

Modules	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
<p>MODULE 1: Introduction to clothing, why do people wear clothes: Protection, Modesty, Adornment Identification, Status, Individuality, Personality, Introduction to fashion: Definition of fashion, when and wear of fashion, what differentiate fashion from Non fashion, are their societies without fashion, how did fashion develop in Europe, why not everyone wears fashion, why does fashion change. Introduction to culture, Introduction to communication. Fashion: What is fashion? Function of fashion, ethnic fashion, fashion and anti-fashion, flow of fashion, fashion life cycle, diffusion of innovations, fashion</p>	08Hrs	L1, L2

leaders and followers, characteristics and influencing factors, social change and fashion, appearance and identity culture, observer and wearer.		
MODULE 2: Fashion and Image: Expression of personality “The true self” putting across an image, self-presentation in everyday life different impressions in different situations. Fashion and society: Role of fashion in society, Impact of fashion on society, importance of fashion in our society, benefits of fashion. Revolutions and tensions, impact of World War on the society, French revolution, Industrial revolution.	08Hrs	L1, L2
MODULE 3: History of Costume: Western civilization, Byzantine Fashion, Medieval fashion, Renaissance fashion, Tudor and Elizabethan fashion, Roman Fashion, Greek fashion, Minoan fashion, Egyptian fashion. Fashion and clothing systems.	08Hrs	L1, L2, L3
MODULE 4: Indian culture and costume: Introduction to Indian clothing, Different types of sarees, Dhoti and Lungi, Punjabi Suits and Purdah, Different types of head gears and caps or turbans, costumes of Mughal Era.	08 Hrs	L1, L2, L3, L4
MODULE 5: What is communication theory, what is culture, aspects of culture, gender differentiation, social status, religion, types of culture. Language: Speech, writing, Para language-kinetics, tone and charter of voice, proxemics, clothing, body language, Non-verbal communication, Proxemics-Space as communication, Chronemics - Time as communication interpersonal communication and self-presentation.	08Hrs	L2, L3, L4
COURSE OUTCOMES: On completion of this course, Students will be able to <ol style="list-style-type: none"> 1. Learn the various importance of clothing like Protection, Modesty, Adornment Identification, Status, Individuality, and Personality. 2. Gain knowledge about the costume history of western and Indian civilization. 3. Will be able to understand the basics of communication through clothing. 		
Graduate Attributes (as per NBA) ➤ Engineering Knowledge		

<ul style="list-style-type: none"> ➤ Problem Analysis ➤ Design/development of solutions (partly) ➤ Interpretation of data
<p>Scheme of Examination / Question paper pattern</p> <ul style="list-style-type: none"> • Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module. • Students have to answer five full questions choosing one full question from each module
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Arnold, Rebecca. Fashion, Desire and Anxiety: Image and Morality in the 20th Century. New Brunswick: Rutgers University Press 2001. 2. Barnard, Malcom. Fashion as Communication. London: Routledge Press 2004 3. A Cultural Approach to Communication, Carey
<p>References:</p> <ol style="list-style-type: none"> 1. Barthes, Roland. The Language of Fashion. New York: Berg Publishers 2006. 2. Weisberger, Lauren. The Devil Wears Prada. New York: Anchor Books 2006.

<p>GLOBAL TRADE PRACTICES [As Per Choice Based Credit System (CBCS) Scheme] SEMESTER - VIII</p>			
Subject Code	15TX834	IA Marks	20
Nu. of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
CREDITS - 03			
<p>COURSE OBJECTIVES :</p> <p>The objective of this course is to make students understand the basic concepts of global business practices followed in textile and garment industries. The course will enable the students to understand the international business scenario, business communication, international trade practices etc.</p>			
MODULES	Teaching Hours	Revised Bloom's Taxonomy (RBT) Level	
<p>MODULE 1: INTRODUCTION: Definition – trade and investment flow – economic theories – forms of international business – Trade procedures and documents – FOREX Policy – Export promotion – Export management – exchange rate determination – Exchange risk – Managing exchange rate.</p>	08Hrs	L1, L2	
<p>MODULE 2: INTERNATIONAL BUSINESS ENVIRONMENT:</p>	08Hrs	L1, L2	

Globalization of business – economic, political and cultural environment of international business – WTO and trade liberalization – emerging issues – implications for India – regional trade blocks – inter – regional trade among regional groups.		
MODULE 3: GLOBAL STRATEGIC MANAGEMENT: Structural design of MNEs – strategic planning – strategic considerations – national Vs global competitiveness. CONTROL AND EVALUATION OF INTERNATIONAL BUSINESS: Control of MNEs – approaches to control – the role of information systems – performance measurement – mechanics of measurement – various performance indicators – evaluation and evaluation systems.	08Hrs	L1, L2, L3
MODULE 4: CONFLICT IN INTERNATIONAL BUSINESS & NEGOTIATIONS: Factors causing conflict – conflict resolution actions – the role of negotiations in international business – the role of international agencies in conflict resolution. COMMUNICATION IN BUSINESS: Systems approach, forms of business communication, management and communication, factors facilitating communication.	08Hrs	L1, L2, L3, L4
MODULE 5: COMMUNICATION PROCESS : Interpersonal perception, selective attention, feedback, variables, listening barriers to listening, persuasion, attending and conducting interviews, participating in discussions, Debates and conferences, presentation skills, paralinguistic features, oral fluency development. BUSINESS CORRESPONDENCE: Business letter. Memos, minutes, agendas, enquiries, orders, salesletters, notice, tenders, letters of application, letter of complaints.	08Hrs	L2, L3
COURSE OUTCOMES: <ol style="list-style-type: none"> 1. This subject helps the student to acquire the concepts of international trade practices in textile and garment business activities. 2. This subject prepares the student to start individual enterprises and carry out international trade practices. 3. Students are exposed to global business scenario, business communication skills etc. so that they apply these concepts in the actual work environment for maximum benefits. 		
Graduate Attributes (as per NBA)		

- Engineering Knowledge
- Problem Analysis
- Design/development of solutions (partly)
- Interpretation of data

Scheme of Examination / Question paper pattern

- Two full questions (with a maximum of four sub questions) of SIXTEEN marks each to be set from each module. Each question should cover all contents of the respective module.
- Students have to answer five full questions choosing one full question from each module
