

**B. E.(Common to all branches)**  
**Choice Based Credit System (CBCS) and Outcome-Based Education (OBE)**  
**SEMESTER - III**

| <b>TRANSFORM CALCULUS, FOURIER SERIES AND NUMERICAL TECHNIQUES</b>  |   |             |     |
|---|---|-------------|-----|
| Course Code   | <b>21MAT 31</b>                                 | CIE Marks   | 50  |
| Teaching Hours/Week (L:T:P:S)   | 2:2:0:0   | SEE Marks   | 50  |
| Total Hours of Pedagogy   | 40  | Total Marks | 100 |
| Credits   | 03  | Exam Hours  | 03  |
| <p><b>Course objectives:</b> The goal of the course Transform Calculus, Fourier series and Numerical techniques 21MAT 31 is</p> <ul style="list-style-type: none"> <li>➤ To have an insight into solving ordinary differential equations by using Laplace transform techniques</li> <li>➤ Learn to use the Fourier series to represent periodical physical phenomena in engineering analysis.</li> <li>➤ To enable the students to study Fourier Transforms and concepts of infinite Fourier Sine and Cosine transforms and to learn the method of solving difference equations by the z-transform method.</li> <li>➤ To develop proficiency in solving ordinary and partial differential equations arising in engineering applications, using numerical methods</li> </ul> |   |             |     |
| <b>Module-1: Laplace Transform</b>  |   |             |     |
| <p>Definition and Laplace transforms of elementary functions (statements only). Problems on Laplace's Transform of <math>e^{at}f(t)</math>, <math>t^n f(t)</math>, <math>\frac{f(t)}{t}</math>. Laplace transforms of Periodic functions (statement only) and unit-step function – problems.<br/>           Inverse Laplace transforms definition and problems, Convolution theorem to find the inverse Laplace transforms (without Proof) problems. Laplace transforms of derivatives, solution of differential equations. <b>(8 Hours)</b><br/> <b>Self-study:</b> Solution of simultaneous first-order differential equations.<br/> <b>(RBT Levels: L1, L2 and L3)</b></p>   |   |             |     |
| <b>Teaching-Learning Process</b>  | Chalk and talk method / PowerPoint Presentation |             |     |
| <b>Module-2: Fourier Series</b>   |   |             |     |
| <p>Introduction to infinite series, convergence and divergence. Periodic functions, Dirichlet's condition. Fourier series of periodic functions with period <math>2\pi</math> and arbitrary period. Half range Fourier series. Practical harmonic analysis. <b>(8 Hours)</b><br/> <b>Self-study:</b> Convergence of series by D'Alembert's Ratio test and, Cauchy's root test.<br/> <b>(RBT Levels: L1, L2 and L3)</b></p>  |   |             |     |
| <b>Teaching-Learning Process</b>  | Chalk and talk method / PowerPoint Presentation |             |     |
| <b>Module-3: Infinite Fourier Transforms and Z-Transforms</b>   |   |             |     |
| <p>Infinite Fourier transforms definition, Fourier sine and cosine transforms. Inverse Fourier transforms, Inverse Fourier cosine and sine transforms. Problems.<br/>           Difference equations, z-transform-definition, Standard z-transforms, Damping and shifting rules, Problems. Inverse z-transform and applications to solve difference equations. <b>(8 Hours)</b><br/> <b>Self Study:</b> Initial value and final value theorems, problems.<br/> <b>(RBT Levels: L1, L2 and L3)</b></p>   |   |             |     |
| <b>Teaching-Learning Process</b>  | Chalk and talk method / PowerPoint Presentation |             |     |

#### **Module-4: Numerical Solution of Partial Differential Equations**

Classifications of second-order partial differential equations, finite difference approximations to derivatives, Solution of Laplace's equation using standard five-point formula. Solution of heat equation by Schmidt explicit formula and Crank- Nicholson method, Solution of the Wave equation. Problems.

**(8 Hours)**

**Self Study:** Solution of Poisson equations using standard five-point formula.

**(RBT Levels: L1, L2 and L3)**

**Teaching-Learning Process**

Chalk and talk method / PowerPoint Presentation

#### **Module-5: Numerical Solution of Second-Order ODEs and Calculus of Variations**

Second-order differential equations - Runge-Kutta method and Milne's predictor and corrector method. (No derivations of formulae).

Calculus of Variations: Functionals, Euler's equation, Problems on extremals of functional. Geodesics on a plane, Variational problems. **(8 Hours)**

**Self Study:** Hanging chain problem

**(RBT Levels: L1, L2 and L3)**

**Course outcomes:** After successfully completing the course, the students will be able to :

- To solve ordinary differential equations using Laplace transform.
- Demonstrate the Fourier series to study the behaviour of periodic functions and their applications in system communications, digital signal processing and field theory.
- To use Fourier transforms to analyze problems involving continuous-time signals and to apply Z-Transform techniques to solve difference equations
- To solve mathematical models represented by initial or boundary value problems involving partial differential equations
- Determine the extremals of functionals using calculus of variations and solve problems arising in dynamics of rigid bodies and vibrational analysis.

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% ( 18 Marks out of 50)in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

#### **Continuous Internal Evaluation:**

1. Three Unit Tests each of **20 Marks (duration 01 hour)**
2. First test at the end of 5<sup>th</sup> week of the semester
3. Second test at the end of the 10<sup>th</sup> week of the semester
4. Third test at the end of the 15<sup>th</sup> week of the semester

#### **Two assignments each of 10 Marks**

5. First assignment at the end of 4<sup>th</sup> week of the semester
6. Second assignment at the end of 9<sup>th</sup> week of the semester

Group discussion/Seminar/quiz any one of three suitably planned to attain the COs and POs for **20 Marks (duration 01 hours)**

7. At the end of the 13<sup>th</sup> week of the semester

The sum of three tests, two assignments, and quiz/seminar/group discussion will be out of 100 marks and will be **scaled down to 50 marks**

(to have less stressed CIE, the portion of the syllabus should not be common /repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

**CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### **Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

- The question paper will be set for 100 marks and marks scored will be proportionally scaled down to 50 marks
- The question paper will have ten questions. Each question is set for 20 marks.
- There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
- The students have to answer 5 full questions, selecting one full question from each module
