QUANTUM PHYSICS AND	Semester	I/II	
Course Code	1BPHEC102/202	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy (Theory and Lab hours)	64	Total Marks	100
Credits	4	Exam Hours	3 hours
Examination type (SEE)	DESCRIPT	IVE	

Course outcome (Course Skill Set)

At the end of the course, the student will be able to:

- 1. Discuss quantum mechanics to analyze microscopic systems, quantized states, and tunneling.
- 2. Analyze electrical conduction in metals and semiconductors, including carrier concentration and Fermi energy.
- 3. Summarize superconductivity phenomena and their applications in advanced materials.
- 4. Describe light-matter interaction, lasers, modulators, and photonic devices in sensor technologies.
- 5. Apply principles and applications of semiconductor, optical devices, sensors, and transducers in electronic and photonic systems.

Module-1

Quantum Physics:

de Broglie Hypothesis, Heisenberg's Uncertainty Principle and its application (Broadneing of Spectral Lines), Principle of Complementarity, Wave Function, Time independent Schrödinger wave equation (Derivation), Physical significance of a wave function and Born Interpretation, Expectation value and its physical significance, Eigen functions and Eigen values, Particle inside one dimensional infinite potential well, Role of higher dimensions (Qualitative), Waveforms and Probabilities, Particle inside a finite potential well and quantum tunneling, Numerical Problems.

Text Book: 1, 2 Reference Book: 2, 3

Number of Hours:

8

Module-2

Electrical Properties of Metals and Semiconductors

Failures of classical free electron theory, Mechanisms of electron scattering in solids, Matheissen's rule, Assumptions of Quantum free electron theory, Density of states, Fermi Dirac statistics, Fermi energy, Variation of Fermi factor with temperature and energy, Expression for carrier concentration in a conductor, Mention of expression for electrical conductivity, Success of quantum free electron theory of metals, Derivation of electron concentration in an intrinsic semiconductor, Expression for electron and hole concentration in extrinsic semiconductor (Qualitative), Fermi level for intrinsic (with derivation) and extrinsic semiconductor (no derivation), Hall effect, Numerical Problems.

Text Books: 1, 3 Reference Books: 1, 9

Number of

Hours: 8

Module-3

Superconductivity

Zero resistance state, Persistent current, Meissner effect, Critical temperature, Critical current (Silsbee Effect) – Derivation for a cylindrical wire using ampere's law, Critical field, Formation of Cooper pairs - Mediation of phonons, Two-fluid model, BCS Theory - Phase coherent state, Limitations of BCS theory, examples of systems with low and high electron-phonon coupling, Type-I and Type-II superconductors, Formation of Vortices, Explanation for upper critical field, Josephson junction, Flux quantization, DC and AC SQUID (Qualitative), Charge Qubit, Numerical Problems.

Text Books: 1, 2, Reference Books: 4, 5, 8

Number of

Hours:8

Module-4

Photonics:

Interaction of radiation with matter – Einstein's A and B coefficients, Prerequisites for lasing actions, Types of LASER – Semiconductor diode LASER, Use of attenuators for single photon sources, Optical modulators – Pockel's effect, Kerr effect, Photodetectors – Photomultiplier tube, Single Photon Avalanche Diode, Optical fiber, Derivation of Numerical aperture, V-number, Number of modes, losses in optical fiber, Mach-Zehnder interferometer, Numerical problems.

Text Books: 1, 2, Reference Book: 6, 7

Number of

Hours:8

Module-5

Semiconductor devices and Sensors

Direct and indirect band gap, Band gap engineering, Zener Diode, LED, PhotoDiode, Photo Transistor, Light dependent resistor, Resistance temperature detectors (high, medium, low), Sensing mechanisms, Piezo electric Sensors, Metal Oxide Semiconductor (MOS) gas sensors, Hall sensor, Superconducting Nanowire Single Photon Detector, Numerical Problems.

Text Book: 4, Reference Book: 1, 10 Number of

Hours:8

PRACTICAL COMPONENTS OF IPCC

PART - A: FIXED SET OF EXPERIMENTS

- 1. Determination of wavelength of LASER using Diffraction Grating.
- 2. Determination of acceptance angle and numerical aperture of the given Optical Fiber.
- 3. Determination of resistivity of a semiconductor by Four Probe Method
- 4. Determination of dielectric constant of the material of capacitor by Charging and Discharging method.
- 5. Study the Characteristics of a Photo-Diode and to determine the power responsivity
- 6. Determination of Plank's Constant using LEDs / Black-Body.
- 7. Determination of Fermi Energy of Copper.
- 8. Interference by the division of amplitude (Air-wedge/Newton's Rings)
- 9. Black-Box Experiment (Identification of basic Electronic Components)
- 10. Study the I-V Characteristics of a Bipolar Junction Transistor and hence determine α and β .
- 11. Resonance in LCR circuit and hence determine the coefficient of self inductance.
- 12. Determine the Energy Gap of the given semiconductor.
- 13. To study the operation of a multimeter and use it for measuring **resistance**, **current**, **voltage**, and for testing **diodes**, **transistors**, **and continuity in conductors**.
- 14. Construction and Analyzing Electronic circuits using one of the following

1. Expeyes: https://expeyes.in/

2. Circuit Lab: https://www.circuitlab.com/

3. Multisim: https://www.multisim.com/

4. DCAClab: https://dcaclab.com/

5. Falstad: https://www.falstad.com/circuit/

Note:

- 1. At least ten laboratory experiments must be conducted.
- 2. Minimum one simulation experiment is mandatory and should be conducted either in the computer lab for the entire batch or on dedicated systems in the physics lab.

Suggested Learning Resources: (Text Book/ Reference Book/ Manuals):

Text books:

- 1. Engineering Physics, Satyendra Sharma and Jyotsna Sharma, Pearson, 2018.
- 2. Engineering Physics, S L Kakani, Shubra Kakani, 3rd Edition, 2020, CBS Publishers and Distributers Pvt. Ltd
- 3. Solid State Physics, S. O. Pillai, New Age International
- 4. Basic Electronics, B L Theraja, Multi-color Edition, S Chand, 2006

Reference books / Manuals:

- 1. Engineering Physics, S Mani Naidu, Pearson, Fourteenth Impression, 2024.
- 2. Beiser, A. (2002). Concepts of Modern Physics (6th ed.). McGraw-Hill Education..
- 3. Griffiths, D. J. (2018). Introduction to Quantum Mechanics (2nd or 3rd ed.). Pearson.
- 4. Tinkham, M. (2004). Introduction to Superconductivity (2nd ed.). Dover Publications.
- 5. Mishra, P. K. (2009). Superconductivity Basics and Applications. Ane Books.
- 6. Ghatak, A., & Thyagarajan, K. (2005). Optical Electronics. Oxford University Press.
- 7. Saleh, B. E. A., & Teich, M. C. (2019). Fundamentals of Photonics (3rd ed.). Wiley
- 8. Nielsen, M. A., & Chuang, I. L. (2010). Quantum Computation and Quantum Information (10th Anniversary ed.). Cambridge University Press.
- 9. Solid State Physics, A J Dekker (2000), Indian Ed., Macmillan Publishers India, New Delhi.
- 10. Principles of Electronics, V K Mehta & Rohit Mehta, S Chand and Company, 7th Edition 2008.

Web links and Video Lectures (e-Resources):

- 1. NPTEL Quantum Mechanics I (IIT Madras): https://nptel.ac.in/courses/115106066
- 2. NPTEL Physics: Introductory Quantum Mechanics (NOC): https://archive.nptel.ac.in/courses/115/104/115104096
- 3. Solid State Physics NPTEL (IIT Madras) https://nptel.ac.in/courses/115106127
- 4. A Brief Course on Superconductivity NPTEL IIT Guwahati (Prof. Saurabh Basu)
- 5. Playlist Introduction Video: https://www.youtube.com/watch?v=SHoGV-sezNI
- 6. Full playlist available via the YouTube channel description or archive link.
- 7. Concepts in Magnetism and Superconductivity NOC (IIT Kharagpur)Series start (Lecture 1): https://digimat.in/nptel/courses/video/115105131/L01.html
- 8. Introduction to Photonics NPTEL (IIT Madras, Prof. Balaji Srinivasan) Lecture 03 to Lecture 12 cover: Direct video link (start Lecture 03): https://nptel.ac.in/courses/108106135/03
- 9. Semiconductor Optoelectronics NPTEL (IIT Delhi, Prof. M. R. Shenoy)Direct video link (start relevant lecture): https://nptel.ac.in/courses/108108174/05
- Sensors and Actuators NPTEL (IISc Bangalore, Prof. Hardik J. Pandya) Lecture 1 Introduction to Sensors, Transducers & Actuators, incl. Hall, RTDs, Thermistors https://digimat.in/nptel/courses/video/108108147/L01.html
- 11. Smart Sensors NPTEL Lecture 34 Covers various sensors including gas, pressure, MOS sensors, photodetectors like SNSPD https://www.youtube.com/watch?v=oRydUfgMdgA
- 12. Lecture 32 Superconducting Qubits (includes Charge Qubit / Cooper-Pair Box) https://www.youtube.com/watch?v=iYo8ALJ-Mls

Teaching-Learning Process (Innovative Delivery Methods):

The following are sample strategies that educators may adopt to enhance the effectiveness of the teaching-learning process and facilitate the achievement of course outcomes.

- 1. .Self Learning using AI Tools
- 2. Activity Based Learning
- 3. Gamification of Activities
- 4. Short Animations and Videos
- 5. Models and Working Models
- 6. Simulations and Interactive Simulations
- 7. Experiential Learning
- 8. Flipped Class Learning
- 9. Hybrid Learning
- 10. ICT Based Learning

Assessment Structure (IPCC): (Circular-Ref.: VTU/BGM/IPCC 2025/3748, DATED: 24TH Oct 2025)

The assessment for each course is equally divided between Continuous Internal Evaluation (CIE) and the Semester End Examination (SEE), with each component carrying **50%** weightage (i.e., 50 marks each).

The CIE Theory component will be **25 marks** and CIE Practical component will be **25 marks**.

The CIE Theory component consists of IA tests for **25 marks**. The CIE Practical component for continuous assessments will be for **15 marks** through rubrics and for lab Internal Assessment will be conducted for **10 marks** through rubrics.

- To qualify and become eligible to appear for SEE, in the CIE theory component, a student must score at least 40% of 25 marks, i.e., 10 marks.
- To qualify and become eligible to appear for SEE, in the CIE Practical component, a student must secure a minimum of 40% of 25marks, i.e., 10marks.
- To pass the SEE, a student must secure a minimum of 35% of 50 marks, i.e., 18 marks.

A student is deemed to have **completed the course** if the **combined total of CIE and SEE** is at least 40 out of 100 marks.

Rubrics for Learning Activity (Based on the nature of learning activity, design the rubrics for each activity):

	Superior	Good	Fair	Needs Im- provement	Unacceptable
Performance Indicator 1 (CO1 - PO1, PO2, PO5, PO11)	Explains quantum mechanical principles and quantized energy levels with clarity and depth	Explains most concepts accu- rately with mi- nor gaps	Shows basic understanding but lacks con- nection to ap- plication	Misunderstands or inconsistently applies key quantum principles	Fails to explain or apply core quantum me- chanics concepts
Performance Indicator 2 (CO2 - PO1, PO2, PO3, PO5, PO11)	Analyzes conduction models and calculates carrier concentration and Fermi levels accurately	Good interpreta- tion with small conceptual er- rors	Partial under- standing with simple calcula- tion attempts	Inaccurate analysis or incomplete application of models	Unable to per- form conduction analysis or inter- pret results
Performance Indicator 3 (CO3 - PO1, PO2, PO4, PO5, PO11)	Evaluates superconductivity and Josephson junction behavior with clear reasoning and examples	Explains effects with fair under- standing and application	Recognizes phenomena but lacks detailed reasoning	Minimal interpretation or misapplication of principles	Fails to identify superconducting phenomena or applications
Performance Indicator 4 (CO4 - PO1, PO2, PO4, PO5, PO11)	Thoroughly investi- gates light-matter interaction and evalu- ates photonic devices effectively	Good device interpretation and physical explanation	Basic knowledge of devices with limited contex- tual clarity	Weak or incon- sistent understand- ing of photonic systems	Lacks or misrep- resents device functionality and interaction con- cepts
Performance Indicator 5 (CO5 - PO1, PO2, PO3, PO5, PO11)	Demonstrates strong understanding and correct use of sensors and transducers in electronic systems	Applies concepts correctly with minor gaps in logic or selection	Recognizes device function but lacks depth in analysis	Incorrect applica- tion or unclear explanation of sensors	Fails to identify or describe de- vices or their functions

Rubrics for CIE – Continuous assessment:

	Superior	Good	Fair	Needs Im- provement	Unacceptable
Performance Indicator 1 (CO1 - PO1, PO2, PO5, PO11)	Explains quantum mechanical princi- ples and quantized energy levels with clarity and depth	Explains most concepts accu- rately with minor gaps	Shows basic understanding but lacks connection to application	Misunderstands or inconsistently applies key quantum principles	Fails to explain or apply core quan- tum mechanics concepts

Performance Indicator 2 (CO2 - PO1, PO2, PO3, PO5, PO11)	Analyzes conduction models and calculates carrier concentration and Fermi levels accurately	Good interpreta- tion with small conceptual errors	Partial under- standing with simple calcu- lation at- tempts	Inaccurate analysis or incomplete ap- plication of models	Unable to perform conduction analy- sis or interpret results
Performance Indicator 3 (CO3 - PO1, PO2, PO4, PO5, PO11)	Evaluates super- conductivity and Josephson junction behavior with clear reasoning and ex- amples	Explains effects with fair under- standing and application	Recognizes phenomena but lacks detailed rea- soning	Minimal interpre- tation or misappli- cation of principles	Fails to identify superconducting phenomena or applications
Performance Indicator 4 (CO4 - PO1, PO2, PO4, PO5, PO11)	Thoroughly investigates light-matter interaction and evaluates photonic devices effectively	Good device interpretation and physical explana- tion	Basic knowledge of devices with limited con- textual clarity	Weak or incon- sistent understand- ing of photonic systems	Lacks or misrepresents device functionality and interaction concepts
Performance Indicator 5 (CO5 - PO1, PO2, PO3, PO5, PO11)	Demonstrates strong understand- ing and correct use of sensors and transducers in elec- tronic systems	Applies concepts correctly with minor gaps in logic or selection	Recognizes device func- tion but lacks depth in anal- ysis	Incorrect applica- tion or unclear explanation of sensors	Fails to identify or describe devices or their functions

	Superior	Good	Fair	Needs Improve- ment	Unacceptable
Performance Indicator 1 (CO1 - PO1, PO2, PO5, PO11)	Explains quantum mechanical prin- ciples and quan- tized energy lev- els with clarity and depth	Explains most concepts accu- rately with mi- nor gaps	Shows basic understand- ing but lacks con- nection to application	Misunderstands or inconsistently applies key quantum principles	Fails to explain or apply core quantum mechanics concepts
Performance Indicator 2 (CO2 - PO1, PO2, PO3, PO5, PO11)	Analyzes conduction models and calculates carrier concentration and Fermi levels accurately	Good interpreta- tion with small conceptual er- rors	Partial understanding with simple calculation attempts	Inaccurate analysis or incomplete application of models	Unable to perform conduction analysis or interpret results
Performance Indicator 3 (CO3 - PO1, PO2, PO4, PO5, PO11)	Evaluates super- conductivity and Josephson junc- tion behavior with clear reason- ing and examples	Explains effects with fair under- standing and application	Recognizes phenomena but lacks detailed reasoning	Minimal interpretation or misapplication of principles	Fails to identify superconducting phenomena or ap- plications
Performance Indicator 4 (CO4 - PO1, PO2, PO4, PO5, PO11)	Thoroughly investigates light- matter interaction and evaluates photonic devices effectively	Good device interpretation and physical explanation	Basic knowledge of devices with limited contextual clarity	Weak or inconsistent understanding of pho- tonic systems	Lacks or misrepresents device functionality and interaction concepts

Rubrics for SEE:

Performance Indicator 5 (CO5 - PO1, PO2, PO3, PO5, PO11)	Demonstrates strong under- standing and correct use of sensors and transducers in electronic sys- tems	Applies concepts correctly with minor gaps in logic or selection	Recognizes device func- tion but lacks depth in analysis	Incorrect application or unclear explanation of sensors	Fails to identify or describe devices or their functions
--	---	---	--	---	--

Suggested rubrics for Practical continuous assessment:

Performance Indicators	Excellent	Very Good	Good	Satisfactory
Fundamental Knowledge (4) (PO1)	The student has well depth knowledge of the topics related to the course (4)	Student has good knowledge of some of the topics related to course (3)	Student is capable of narrating the answer but not capable to show in depth knowledge (2)	Student has not understood the concepts clearly (1)
Design Of Experiment (5) (PO2 & PO3)	Student is capable of discussing more than one design for his/her problem statement and capable of proving the best suitable design with proper reason (5)	Student is capable of discussing few designs for his/her problem statement but not capable of selecting best (4)	Student is capable of discussing single design with its merits and de-merits (3)	Student is capable of explaining the design (1-2)
Implementation (8) (PO3 & PO7)	Student is capable of implementing the design with best suitable algorithm considering optimal solution. (7-8)	Student is capable of implementing the design with best suitable algorithm and should be capable of explaining it (5-6)	Student is capable of implementing the design with proper explanation. (3-4)	Student is capable of implementing the design. (1-2)
Result &Analysis (5) (PO4)	Student is able to run the program on various cases and compare the result with proper analysis. (5)	Student will be able to run the program for all the cases. (4)	Student will be able to run the code for few cases and ana- lyze the output (3)	Student will be able to run the program but not able to analyze the output (1-2)
Demonstration (8) (P08)	The lab record is well- organized, with clear sec- tions (e.g., Introduction, Method, Results, Conclu- sion). Transitions between sections are smooth. (7-8)	The lab record is organized, with clear sections, but some sections are not well-defined. (5-6)	The lab record lacks clear organization or structure. Some sections are unclear or incomplete. (3-4)	The lab record is poorly organized, with missing or unclear sections. (1-2)

Note: Can add Engineering & IT tool usage based on the nature of the course

Suggested Learning Activities may include (but are not limited to):

- Course Project
- Case Study Presentation
- Programming Assignment
- Tool/Software Exploration
- Literature Review

- Open Book Test (preferably at RBL4 and RBL5 levels)
- GATE-based Aptitude Test
- Assignment (at RBL3, RBL4, or RBL5 levels)
- Any other relevant and innovative academic activity
- Use of MOOCs and Online Platforms
