<b>Elective - 3</b>	
16CTE421	Urban Mass Transport Systems
16CTE422	Pavement Evaluation And Management
16CTE423	Applications of Soft Computing Techniques
16CTE424	Rural Roads

**Note:**

- 1. Project Phase-1:** 6-week duration shall be carried out between 2<sup>nd</sup> and 3<sup>rd</sup> Semester vacation. Candidates in consultation with the guide shall carry out literature survey/ visit industries to finalize the topic of Project.
- 2. Project Phase-2:** 16-week duration during 4<sup>th</sup> semester. Evaluation shall be done by the committee constituted comprising of HOD as Chairman, Guide and senior faculty of the department.
- 3. Project Evaluation:** Evaluation shall be taken up at the end of 4<sup>th</sup> semester. Project work evaluation and Viva-Voce examination shall conducted
- 4. Project evaluation:**
  - a. Internal Examiner shall carry out the evaluation for 100 marks.
  - b. External Examiner shall carry out the evaluation for 100 marks.
  - c. The average of marks allotted by the internal and external examiner shall be the final marks of the project evaluation.
  - d. Viva-Voce examination of Project work shall be conducted jointly by Internal and External examiner for 100 marks.

**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

<b>TRAFFIC ENGINEERING - 1</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 -2017)			
<b>SEMESTER – I</b>			
Subject Code	16CTE11	IA Marks	20
Number of Lecture ours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Provide an insight on traffic and its components, factors affecting road traffic and the design of intersection</li> <li>• Explain sampling of data, analysis and interpretation of data in conducting various surveys</li> <li>• Explain traffic movements, types of intersections, islands, crossings and their design.</li> <li>• Illustrate the design of signals and explain the redesigning of existing signals</li> <li>• Provide an insight on traffic regulations, pollution caused by traffic and the method of controlling pollution</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Introduction</b>			<b>10</b>
Objectives and scope of traffic engineering, Components of road traffic - the vehicle, driver and road, Road user characteristics; human and vehicle characteristics, factors affecting road traffic; methods of measurement. Concepts of passenger car units for mixed traffic flow.			
<b>Module 2: Traffic Engineering Studies and Analysis</b>			<b>10</b>
Sampling in Traffic Studies, Adequacy of Sample Size; Objectives, methods of traffic study, equipment, data collection, analysis and interpretation (including case studies) of (i) Spot speed (ii) Speed and delay (iii) Volume (iv) Origin - Destination (v) Parking (vi) Accident studies.			
<b>Module - 3 : Design of Traffic Engineering Facilities</b>			<b>10</b>
Control of Traffic Movements through Time Sharing and Space Sharing Concepts; Design of Channelizing Islands, T, Y, Skewed, Staggered, Roundabout, Mini-roundabout and other forms of at-Grade Crossings including provision for safe crossing of Pedestrians and Cyclists; Grade Separated Intersections, their Warrants and Design Features; Design of Road Lighting.			
<b>Module 4 :Traffic Control Devices:</b>			<b>10</b>
Traffic signs, markings, islands and signals. Different methods of signal design; redesign of existing signal including case studies. Signal system and co-ordination.			
<b>Module 5: Traffic Regulations and Control:</b>			<b>10</b>
General regulations: Regulations on Vehicles, drivers and flow; Other regulations and control. Traffic management; noise and air pollution due to road traffic and method of control.

<b>PAVEMENT MATERIALS</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 - 2017)			
<b>SEMESTER - I</b>			
Subject Code	16CTE 12	IA Marks	20
Number of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Explain the different types, properties and tests on soil subgrade</li> <li>• Explain the properties of aggregates and different test procedures and specifications</li> <li>• Explain the origin, properties, constituents and preparation of bitumen and tar</li> <li>• Explain about cut back bitumen and bitumen emulsions, test procedures and the uses</li> <li>• Explain mechanism of stripping, adhesion failures and methods to improve adhesion</li> <li>• Illustrate the bituminous mix design method.</li> <li>• Explain in detail about HMA, WMA, CMA</li> <li>• Explain types of cement, tests on cement, types of concrete, fillers and sealers</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Soil</b>			<b>10</b>
Characterization: Properties of subgrade layers; different types of soils, Soil Classification; Index and other basic properties of soil; A critical look at the different laboratory and in - situ procedures for evaluating the mechanical properties of soils viz. SPT, CPT, CBR, Plate Load test, Field compaction and control.			
<b>Module 2: Aggregates</b>			<b>10</b>

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Origin, classification, requirements, properties and tests on road aggregates, mechanical and shape properties of aggregates, Aggregate texture and skid resistance, polishing of aggregates; concepts of size and gradation - design gradation, maximum aggregate size, aggregate blending to meet specification, Fuller and Thompson's Equation, 0.45 power maximum density graph, Sampling of aggregates.	
<b>Module - 3 : Bitumen</b>	<b>10</b>
Bitumen and Tar: Origin, preparation, properties and chemical constitution of bituminous road binders; requirements, bitumen structure, Rheology of bitumen, Elastic modulus, Dynamic modulus, visco-elastic and fatigue properties, creep test, Bituminous Emulsions and Cutbacks, Preparation, characteristics, uses and tests, Adhesion of Bituminous Binders to Road Aggregates: Adhesion failure, mechanism of stripping, tests and methods of improving adhesion.	
<b>Module 4 : Bituminous Mixes</b>	<b>10</b>
Resilient and Complex (Dynamic) Moduli of Bituminous Mixes, Permanent Deformation Parameters and other Properties. Modified bitumen: Crumb Rubber Modified bitumen, Natural rubber modified bitumen, polymer modified bitumen; Long term and short term ageing and its effect on bitumen performance, Tests to simulate ageing of bitumen viz. RTFOT and PAV. Desirable properties of bituminous mixes, Design of bituminous mixes: Modified Marshall's specifications, Hubbard Field method of mix design, Hveem's method of mix design; Introduction to super pave mix design procedure, Modified binders, HMA, WMA, CMA	
<b>Module 5 : Cement and Concrete</b>	<b>10</b>
Types of cements and basic cement properties, Quality tests on cement; Tests on cement concrete including compressive strength, flexural strength, modulus of elasticity and fatigue properties; Introduction to advanced concretes like self compacted concrete, Light weight concrete, Roller Compacted Concrete for pavement application; Joint fillers and sealers for Jointed Plain Cement Concrete Pavements and their characterization.

<b>APPLIED SOIL MECHANICS AND GROUND IMPROVEMENT TECHNIQUES</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 -2017)			
SEMESTER - I			
Subject Code	16CTE 13	IA Marks	20
Number of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Explain the origin, formation, classification of soil, index properties and their determination, types of soil exploration programmes</li> <li>• Provide information shear strength of soil and its measurement, elastic properties of soil</li> <li>• Explain various ground improvement techniques and the types of compaction and its effect on soil properties</li> <li>• Explain the types of drains and various stabilization techniques</li> <li>• Inform about the types of reinforcement and design principles, grouting techniques</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Introduction To Soil Mechanics And Site Investigation</b>			<b>10</b>
Soil Mechanics applications to Highway Engineering. Soil formations, Types, Regional Soil deposits of India, Index properties, their determination, importance, various soil classification systems, HRB classification, problems on these.			
Site Investigation: Introduction, Planning exploration programmes, Types of Exploration, Location and depth of Borings, Methods, Samplers, SPT, Subsoil investigation Report, Geophysical methods			
<b>Module 2: Shear Strength Of Soil</b>			<b>10</b>
Introduction, Importance, Measurements, shear strength of clay and Sand, Elastic properties of soil – Tangent, Secant modulus, Stress – Strain curves, Poisson’s ratio, Shear Modulus			
<b>Module - 3 : Ground Improvement</b>			<b>10</b>
Definition, Objectives of ground improvement, Classification of ground improvement techniques			
Soil Compaction- Effect of grain size distribution on compaction for various soil types like lateritic soil, coarse-grained soil and micaceous soil. The Effects of compaction on engineering behaviour like compressibility, swelling and shrinkage, permeability, relative density, liquefaction potential.			
Field compaction – static, dynamic, impact and vibratory type. Shallow and deep compaction, Dynamic Compaction, Vibrofloatation			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

<b>Module 4 : Hydraulic Modification And Chemical Modification</b>		<b>10</b>	
<p>Hydraulic modification –Definition, gravity drain, lowering of water table, multistage well point, vacuum dewatering. Vertical drains, Sand drains, Drainage of slopes, Electro kinetic dewatering, Preloading.</p> <p>Chemical modification – Definition, cement stabilization, sandwich technique, admixtures. Hydration – effect of cement stabilization on permeability, Swelling and shrinkage and strength and deformation characteristics,. Stabilization using Fly ash. Lime stabilization – suitability, process, criteria for lime stabilization. Other chemicals like chlorides, hydroxides, lignin and hydrofluoric acid. Bitumen, tar or asphalt in stabilization.</p>			
<b>Module 5: Soil Reinforcement</b>		<b>10</b>	
<p>Earth reinforcement – Principles and mechanism of reinforced earth-reinforced soil retaining structures, Synthetic and natural fibre based Geotextiles and their applications - Filtration, drainage, separation, and erosion control. Design Principles of steep reinforced soil slopes – pavements – Embankments on soft soils, introduction to soil nailing concepts</p> <p><b>Miscellaneous Methods (Only Concepts &amp; Uses):</b></p> <p>Grouting: Introduction, Effect of grouting. Chemicals and materials used. Types of grouting, Grouting procedure, Applications of grouting.</p> <p>Thermal methods, Crib walls, Gabions and Mattresses, Anchors, Rock bolts, Stone Column, Micropiles.</p>			
<b>TEXT BOOKS</b>

<b>URBAN TRANSPORT PLANNING</b>			
<b>[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 -2017)</b>			
<b>SEMESTER – I</b>			
Subject Code	16CTE 14	IA Marks	20
Number of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Recall basic concepts and methods of urban transportation planning in the India.</li> <li>• Summarize methods of designing, conducting and administering surveys to provide the data required for transportation planning.</li> <li>• Examine and apply travel demand modeling, Mode Choice Modeling and Traffic Assignment Modeling.</li> <li>• Formulate the need of land use modeling and illustrate land use models for urban transportation planning</li> </ul>			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Particulars	Hours
<b>Module 1: Introduction</b>	<b>10</b>
Introduction to transportation planning, scope and objective of UTP, various modes of transportation and comparisons, urban transportation system planning process, transportation demand and forecast.	
<b>Module 2: Transportation Planning Process &amp; Surveys</b>	<b>10</b>
System approach to urban planning, Stages in transportation planning, Basic Movements-Study Area-Zones-Surveys-Planning of different types of surveys-Inventory of transportation facilities	
<b>Module - 3 : Trip generation &amp; Trip distribution</b>	<b>10</b>
Trip generation: Trip purpose- Factors governing trip generation and attraction- Category analysis-Problems on above Trip distribution: Methods- Growth factors methods- Synthetic methods- Fratar and Furness method and problems on the above	
<b>Module 4 : Model Split &amp; Trip Assignment</b>	<b>10</b>
Model Split: Factors affecting- characteristics of split- Model split in urban transport planning- problems on above Trip Assignment: Assignment techniques- problems on all techniques, minimum path tree problems.	
<b>Module 5:</b>	<b>10</b>
Interdependency of Land Use & transport, characteristics of land use Models-Lowry Model- Hansen's Accessibility Model-Density- Saturation Gradient Model-Problems(Exception Lowry Model & DSGM)- Difficulties in planning small & medium cities- Recent case studies

**REMOTE SENSING AND GIS IN TRANSPORT PLANNING**

[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 -2017)

**SEMESTER - I**

Subject Code	16CTE 151	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Explain the purpose of accurate mapping of all features under different spatial and temporal scales of all kinds of terrain and land under water bodies.</li> <li>• Discuss on the advantages of remote sensing compared to traditional surveying techniques in terms of time, accuracy and output.</li> <li>• Explain the purpose and methods of obtaining abstract data both spatial and temporally.</li> <li>• Illustrate the application of GIS and remote sensing in solving real world transportation problems</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Introduction to remote sensing</b>			<b>8</b>
Definition – Components of Remote Sensing – Energy, Sensor, Interacting Body –Active and Passive Remote Sensing – Platforms– Aerial and Space Platforms –Balloons, Helicopters, Aircraft and Satellites – Electromagnetic Radiation– EMR Spectrum.			
<b>Module 2: Introduction to GIS</b>			<b>10</b>
Basic Concept and Components – Hardware, Software –Data Spatial and non-spatial – Geo-referencing – Map Projection – Types of Projection – Simple Analysis – Data retrieval and querying.			
<b>Module - 3 : Data structures and analysis</b>			<b>10</b>
Database – Raster and Vector data structures – Datastorage – Run length, Chain and Block coding – Vector data storage –			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Topology – GIS Modeling - Raster and Vector data analysis – Buffering and overlaying techniques – Network Analysis – Spatial Analysis			
<b>Module 4 : Basic applications in transportation</b>			<b>10</b>
Highway and Railway Alignment, location of transport terminals and roadside facilities, bus stops – Route optimization – Bus route rationalization – Accident analysis – Applications of Aerial Photography and Satellite Imageries			
<b>Module 5: Advanced applications</b>			<b>10</b>
GIS as an integration technology – Integration of GIS, GPS and Remote Sensing Techniques – Advanced Traveller Information System (ATIS) – Automatic Vehicle Location System (AVLS)

<b>RAILWAY INFRASTRUCTURE PLANNING AND DESIGNING</b> [As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 -2017) <b>SEMESTER - I</b>			
Subject Code	16CTE 152	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>To understand the importance of railway infrastructure planning and design.</li> </ul>			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

<ul style="list-style-type: none"> <li>• To identify the factors governing design of railway infrastructures.</li> <li>• To apply track design principles, components and design criteria</li> <li>• To design and analyze the railway track system and signal system with the available methods.</li> <li>• To maintain the railway track and apply remedial measures</li> <li>• To execute the minor and major projects related to railway infrastructure.</li> </ul>	
Particulars	Hours
<b>Module 1: Alignment of Railway Lines</b>	<b>10</b>
Modes of transportation, developments in railways, classification of railway lines, railway track gauges, ideal alignment, traffic survey, reconnaissance survey, preliminary surveys, and engineering surveys, geometric design, gradients, grade compensation, speeds of trains, curves and superelevation, extra clearance on curves, widening of gauge on curves.	
<b>Module 2: Permanent Way</b>	<b>10</b>
Requirements, cross-sections, forces acting on the track, coning of wheels, tilting of rails, function of rails, types of rails, rail wear, defects in rails, creep of rails, rail fixtures and fastenings, ballast, functions, types, sizes, physical properties, subgrade and formation, slopes of formation, switches, tongue rails, crossing, angle of crossing, turnouts, inspection and maintenance, track junctions and track layouts, three-throw switch, design features of a turnout, crossings.	
<b>Module 3 : Signalling and interlocking, Design of tracks for high speeds</b>	<b>10</b>
Objectives, classification, fixed signals, stop signals, signalling systems, mechanical signalling system, electrical signalling system, systems for controlling train movement, interlocking, modern signalling installations. Modernization of railways, effect of high speed track, vehicle performance on track, high speed ground transportation system, ballast less track, elevated railways, underground and tube railways.	
<b>Module 4 : Rolling Stock, Railway sections and yards</b>	<b>10</b>
Types of traction, locomotives and other rolling stock, brake systems, resistance due to friction, wave action, wind, gradient, curvature, starting, Tractive effort of a locomotive, hauling power of a locomotive. Purpose, site selection, facilities, requirements, classification, platforms, building areas, types of yards, foot over bridges, subways, cranes, weigh bridge, loading gauge, end loading ramps, locomotive sheds, ash-pits, water columns, turntable, triangles, buffer stop, scotch block.	

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

<b>Module 5 : Railway accidents, Track maintenance and Rehabilitation</b>			<b>10</b>
Train accidents, derailments and its causes, restoration of traffic, safety measures, disaster management, classification of level crossings, accidents at level crossings, remedial measures, maintenance of level crossings. Maintenance tools, maintenance of rail surface, track drainage, maintenance in track circuited lengths, track tolerances, mechanized method of track maintenance, off -track tampers, shovel packing, directed track maintenance, classification of renewal works, through sleeper renewals, mechanized relaying, track renewal trains.

<b>ADVANCE CONCRETE TECHNOLOGY</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 -2017)			
<b>SEMESTER - I</b>			
Subject Code	16CTE 153	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• This course will provide the students with state-of-the art knowledge on durable and sustainable cement and concrete,</li> <li>• This course will empower students to become technical leaders in the concrete</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Concrete Making Materials</b>			<b>10</b>

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Cement – Bogus Compounds – Hydration Process – Types of Cement – Aggregates – Gradation Charts – Combined Aggregate – Alkali Silica Reaction – Admixtures – Chemical and Mineral Admixtures.	
<b>Module 2: Fresh and Hardened Concrete</b>	<b>10</b>
Fresh Concrete – workability tests on Concrete – Setting Times of Fresh Concrete – Segregation and bleeding. Hardened Concrete: Abrams Law, Gel space ratios, Maturity concept – Stress strain behaviour – Creep and Shrinkage – Durability Tests on Concrete – Non Destructive Testing of Concrete.	
<b>Module 3: High Strength Concrete</b>	<b>10</b>
Microstructure – Manufacturing and Properties – Design of HSC Using Erintroy Shaklok method – Ultra High Strength Concrete. High Performance Concrete – Requirements and Properties of High Performance Concrete– Design Considerations.	
<b>Module 4: Special Concretes</b>	<b>10</b>
Self Compacting concrete, Polymer Concrete, Fibre Reinforced Concrete– Reactive Powder Concrete – Requirements and Guidelines – Advantages and Applications. Concrete Mix Design: Quality Control – Quality Assurance – Quality Audit - Mix Design Method – BIS Method – DOE Method – Light Weight Concrete, Self Compacting Concrete.	
<b>Module 5: Form work</b>	<b>10</b>
Materials – structural requests – form work systems – connections – specifications – design of form work – shores – removal for forms - shores – reshoring – failure of form work.

<b>INTELLIGENT TRANSPORTATION SYSTEMS</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017)			
SEMESTER - I			
Subject Code	16CTE154	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam	03

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

	Hours
<b>COURSE OBJECTIVES:</b>	
<ul style="list-style-type: none"> <li>• Learn the objectives, benefits and the telecommunications in ITS.</li> <li>• Learn about the functional areas, user needs and services in ITS.</li> <li>• Learn the concepts of ITS operations and applications.</li> </ul>	
<b>Particulars</b>	<b>Hours</b>
<b>Module 1: Introduction to Intelligent Transportation Systems (ITS)</b>	<b>10</b>
Definition, Objectives, Historical Background, Benefits of ITS -ITS Data collection techniques – Detectors, Automatic Vehicle Location (AVL), Automatic Vehicle Identification (AVI), Geographic Information Systems (GIS), video data collection.	
<b>Module 2: Telecommunications in ITS</b>	<b>10</b>
Information Management, Traffic Management Centers (TMC). Application of sensors to Traffic management; Traffic flow sensor technologies; Transponders and Communication systems; Data fusion at traffic management centers; Sensor plan and specification requirements; Elements of Vehicle Location and Route Navigation and Guidance concepts	
<b>Module - 3 : ITS functional areas, User Needs and Services –</b>	<b>10</b>
Advanced Traffic Management Systems (ATMS), Advanced Traveler Information Systems (ATIS), Commercial Vehicle Operations (CVO), Advanced Vehicle Control Systems (AVCS), Advanced Public Transportation Systems (APTS), Advanced Rural Transportation Systems (ARTS). Travel and Traffic management, Public Transportation Management, Electronic Payment, Commercial Vehicle Operations, Emergency Management, Advanced Vehicle safety systems, Information Management.	
<b>Module 4 : ITS Operations</b>	<b>10</b>
Regional and Project ITS architecture; Concept of operations; ITS Models and Evaluation Methods; Planning and human factor issues for ITS, Case studies on deployment planning and system design and operation; ITS and safety, ITS and security, ITS as a technology deployment program, research, development and business models, ITS planning	
<b>Module 5: ITS applications</b>	<b>10</b>
Traffic and incident management systems; ITS and sustainable mobility, travel demand management, electronic toll collection, ITS and road-pricing.; Transportation network operations; commercial vehicle operations ; public transportation applications; Automated Highway Systems- Vehicles in Platoons –ITS in World – Overview of ITS implementations in developed countries.

**SEMESTER - I**

Subject Code	16CTE16	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Explain the properties of aggregates and different test procedure of conduction and specifications</li> <li>• Explain procedures of conducting tests on neat bitumen and modified bitumen</li> <li>• Explain Rothfutch method of marshal mix design</li> <li>• Explain CBR test to know the strength characteristics of soil</li> <li>• Explain procedure for different tests on cement and mix design</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: TESTS ON AGGREGATES</b>			<b>10</b>
Basic tests such as crushing strength, abrasion value, impact value, combined index value, specific gravity and water absorption.			
<b>Module 2: TEST ON NEAT AND MODIFIED BITUMEN</b>			<b>10</b>
Basic tests on neat bitumen such as penetration, softening point, viscosity, ductility, flash and fire point and			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

specific gravity. Basic tests on modified bitumen such as penetration, softening point, viscosity, elastic recovery, flash and fire point, specific gravity and loss on heating.			
<b>Module 3 : TEST ON BITUMINOUS MIXES</b>			<b>10</b>
Proportioning of materials by Rothfutch's method and Mix design by Marshall Method.			
<b>Module 4 : TEST ON SOILS</b>			<b>10</b>
CBR test.			
<b>Module 5 : TEST ON CEMENT&amp; CONCRETE</b>			<b>10</b>
Basic tests on cement concrete such as workability test, soundness test, compressive strength, split tensile strength and flexural strength. Concrete mix design.

<b>TRAFFIC ENGINEERING - 2</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017)			
<b>SEMESTER - II</b>			
Subject Code	16CTE21	IA Marks	20
Number of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Learn the relationships between the parameters of traffic flow and the types of flow theories.</li> <li>• Learn the concept of design vehicle and design volume to be considered along with the concept of roadway capacity and level of service.</li> <li>• Learn the probabilistic aspects of vehicle arrivals, gap acceptance and delays.</li> <li>• Learn the principles of traffic forecasting and simulation in traffic engineering.</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Traffic Flow Theory</b>			<b>10</b>

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Fundamental flow relationship and their applications, Traffic flow theories and applications; Shock Waves; Queuing theory and applications.	
<b>Module 2: Design Hourly Volume for Varying Demand Conditions:</b>	<b>10</b>
Concept of Design vehicle units and concept of PCU under mixed traffic conditions, Price-volume relationships and demand functions. Design hourly volume, critical hour concept.	
<b>Module - 3 : Highway Capacity</b>	<b>10</b>
Factors affecting capacity, level of service; Capacity studies, Capacity of different highway facilities including un-signalized and signalized intersections. Problems in Mixed Traffic flow, Case studies.	
<b>Module 4 : Probabilistic Aspects of Traffic Flow:</b>	<b>10</b>
Vehicle arrivals, distribution models, gaps and headway distribution models; gap acceptance merging parameters, delay models, applications.	
<b>Module 5: Traffic Forecast</b>	<b>10</b>
General travel forecasting principles, different methods of traffic forecast-Mechanical and analytical methods, Demand relationships, methods for future projection. <b>Simulation:</b> Fundamental principle, application of simulation techniques in traffic engineering formulation of simulation models, Case studies. Formulation of system models.

<b>PAVEMENT DESIGN AND ANALYSIS</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017)			
<b>SEMESTER - II</b>			
Subject Code	16CTE22	IA Marks	20
Number of Lecture Hours/Week	04	Exam Marks	80

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Total Number of Lecture Hours	50	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Identify and categorize the factors affecting design and performance of pavements</li> <li>• Explain the basic modeling concepts used to analyze flexible and rigid pavements.</li> <li>• Explain different design methods for flexible and rigid pavement design</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Introduction</b>			<b>10</b>
Factors Affecting Pavement Design, Variables Considered in Pavement Design, Types of Pavements, Functions of Individual Layers, Classification of Axle Types, Tire Pressure, Contact Pressure, EAL and ESWL Concept, Lane Distributions & Vehicle Damage Factors, Effect of Transient & Moving Loads			
<b>Module 2: Stresses And Deflections In Flexible Pavements</b>			<b>10</b>
Stresses and deflections in homogenous masses. Burmister's two-layer theory, three layer and multilayer theories, Problems on above.			
<b>Module - 3 : Flexible Pavement</b>			<b>10</b>
Design Methods Principle, design steps, advantages and applications of different pavement design methods – Group Index, CBR, McLeod, Kansas Triaxial test, IRC, AASHTO and Asphalt Institute methods			
<b>Module 4 : Stresses In Rigid Pavements</b>			<b>10</b>
Factors affecting design and performance of pavements. Types of stresses and causes, factors influencing the stresses, general considerations in rigid pavement analysis, EWL, wheel load stresses, warping stresses, frictional stresses, combined stresses. Problems on above.			
<b>Module 5: Rigid Pavement Design</b>			<b>10</b>
Types of joints in cement concrete pavements and their functions, joint spacing, design of CC pavement for roads and runways, design of joint details for longitudinal joints, contraction joints and expansion joints. IRC method of design by stress ratio method. Design of continuously reinforced concrete pavements. Problems on above

**GEOMETRIC DESIGN OF TRANSPORTATION FACILITIES**

[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017)

**SEMESTER - II**

Subject Code	16CTE23	IA Marks	20
Number of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03

**COURSE OBJECTIVES:**

- Learn the importance of geometric design elements and the cross sectional elements.
- Learn the importance of sight distances and the components of horizontal and vertical alignment.
- Learn about the various types of intersections and their suitability.
- Learn about the various types of facilities for pedestrians, cycles, buses and parking.

<b>Particulars</b>	<b>Hours</b>
<b>Module 1: Introduction</b>	<b>10</b>
Functional Classification of Highway systems, Objectives of highway geometric design, elements of geometric design, design controls and criteria. <b>Cross Section Elements:</b> Pavement surface characteristics – skid resistance, cross slope, unevenness, light reflecting characteristics. Width considerations for carriageway, formation, shoulders, kerbs, traffic barriers, medians, frontage roads, right of way. Facilities for pedestrians and bicycles.	
<b>Module 2: Sight Distances</b>	<b>10</b>
Types, analysis, factors affecting and design of stopping sight distance, intermediate sight distance and overtaking distance. <b>Horizontal Alignment:</b> Design speed, stability at curves, analysis and design of super elevation, extra widening of pavements, design of transition curves, curvature at intersections	
<b>Module - 3 : Vertical alignment</b>	<b>10</b>
Classification of grades, change of gradients, design of summit curves for sight distance consideration, design of valley curves for comfort and sight distance considerations. Combination of vertical and horizontal alignment including design of hairpin bends, design standards for expressways and hill roads. IRC standards and guidelines.	

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

<b>Module 4 : Design of Intersections</b>	<b>10</b>
Types of intersections, characteristics and design considerations of at-grade intersections; different types of islands, channelization, median openings. Rotary intersections – warrants, design and suitability. Grade separated intersections - types, warrants and suitability. Interchanges and ramps.	
<b>Module 5: Miscellaneous Facilities</b>	<b>10</b>
Pedestrian facilities especially on urban – types, IRC specification. Bicycle tracks -types, guidelines, and IRC design standards. Bus bays - types, guidelines and IRC design standards. Parking facilities - types, guidelines and IRC design standards.	
<b>TEXT BOOKS</b>	
1. AASHO, “A Policy on Geometric Design of Highways and Streets”, American Association of State Highway and Transportation Officials, Washington D.C.

<b>TRANSPORTATION ECONOMICS AND EVALUATION</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017)			
<b>SEMESTER - II</b>			
Subject Code	16CTE24	IA Marks	20
Number of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Explain the basic terminology of economics and its application in transportation</li> <li>• Define the concept and components involved in economic evaluation</li> <li>• Explain the various methods of economic analysis and ranking of alternatives</li> <li>• Illustrate the method of economic evaluation for transportation projects</li> </ul>			
<b>Particulars</b>			<b>Hours</b>

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

<b>Module 1: Principles of Economics</b>	<b>10</b>
Supply and demand models, Consumer's surplus and social surplus criteria, and framework for social accounting: accounting rate of interest, social opportunity cost, rate of interest, social time preference rate of interest, accounting prices of goods and services, measuring input costs, applications on social accounting.	
<b>Module 2: Transport Costs and Benefits</b>	<b>10</b>
Fixed and variable cost, cost of improvement, maintenance cost, cost estimating methods, accounting for inflation, external costs, Direct benefits: reduced vehicle operation costs, value of travel time savings, value of increased comfort and convenience, cost of accident reduction, reduction in maintenance cost.	
<b>Module - 3 : Economic Analysis:</b>	<b>10</b>
Generation and screening of project alternatives, different methods of economic analysis: annual cost and benefit ratio methods, discounted cash flow methods, shadow pricing techniques, determination of IRR and NPV, examples of economic analysis, application economic theory in traffic assignment problem.	
<b>Module 4 : Project Evaluation</b>	<b>10</b>
Framework of evaluation, transport planning evaluation at urban and regional levels, other evaluation procedures, environmental evaluation, safety evaluation, project financing.	
<b>Module 5: Environmental impact assessment</b>	<b>10</b>
Basic Concepts, Objectives, Transportation Related Environmental Impacts – Vehicular Impacts – Safety and Capacity Impacts – Roadway Impacts – Construction Impacts, Environmental Impact Assessment – Environmental Impact Statement, Environment Audit, Typical case studies

**ROAD SAFETY MANAGEMENT**

[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year  
2016 -2017)

**SEMESTER - II**

Subject Code	16CTE251	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03

**COURSE OBJECTIVES:**

- Explain the causes of accidents, statistical measures of accident data analysis and computer application in data analysis
- Explain different parameters responsible for providing road safety in the construction of new roads
- Explain road reconstruction principle and improvement of road considering the different components of road and intersections
- Explain road safety and maintenance measures for road in operation considering pedestrian, cyclists and road furniture
- Explain road safety audit principle and procedure, various traffic management techniques and their effectiveness

<b>Particulars</b>	<b>Hours</b>
<b>Module 1: Road accidents, Causes, Scientific Investigations and Data Collection</b>	<b>10</b>
Analysis of Individual accidents to arrive at Real Causes, Statistical Methods of Analysis of Accident Data, Application of Computer Analysis of Accident Data.	
<b>Module 2: Ensuring Traffic Safety in Designing New Roads</b>	<b>10</b>
Meteorological Conditions, Structure of Traffic Streams, Orientation of a Driver on the Direction of a Road beyond the Limits of Actual Visibility and Roadway Cross Section & Objects on the Right-of-Way.	
<b>Module - 3 : Ensuring Traffic Safety in Road Reconstruction</b>	<b>10</b>
Road Reconstruction and Traffic Safety, Reconstruction Principles, Plotting of Speed Diagram for Working out Reconstruction Projects, Use of Accident Data in Planning Reconstruction of Roads, Examples of Reconstruction of Selected Road Sections for Improving Traffic Safety, Improving Traffic Conditions on Grades, Sharp Curves, Redesign of Intersections, Channelized At-Grade Intersections, Bus Stops, Parking & Rest Areas and Effectiveness of Minor Road Improvements.	
<b>Module 4 : Ensuring Traffic Safety in Road Operation</b>	<b>10</b>
Ensuring Traffic Safety during Repair and Maintenance, Prevention of Slipperiness and Influence of	

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Pavement Smoothness, Restriction speeds on Roads, Safety of Pedestrians, Cycle Paths, Informing Drivers on Road Conditions with Aid of Signs, Traffic Control Lines & Guide Posts, Guardrails & Barriers and Road Lighting.			
<b>Module 5: Road Safety Audit and Traffic Management Techniques</b>			<b>10</b>
Principles- Procedures and Practice, Code of Good Practice and Checklists. Road safety issues and engineering, education, enforcement measures for improving road safety. Local area management, Various types of long term traffic management measures and their uses. Evaluation of the effectiveness and benefits of different traffic management measures, management and safety practices during road works.

<b>APPLIED STATISTICS IN TRANSPORTATION ENGINEERING</b> [As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017) <b>SEMESTER - II</b>			
Subject Code	16CTE 252	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Explain different statistical methods used in transportation engineering problems, measures of central tendency, correlations methods</li> </ul>			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

<ul style="list-style-type: none"> <li>• Illustrate the use of probability and discrete distributions in transportation engineering problems</li> <li>• Explain significance testing to check goodness of fit</li> <li>• Explain time series analysis</li> <li>• Explain different graphical methods and statistical software packages useful in transportation engineering field</li> </ul>	
<b>Particulars</b>	<b>Hours</b>
<b>Module 1: Introduction</b>	<b>10</b>
Statistical methods, scope and limitations, population and sample, frequency distribution measure of central tendency-measures of Dispersion- standard deviation, coefficient of variation, skewness. Variables -scatter diagram, Curve fitting methods, correlation linear regression and multiple linear regressions. Multivariate data analysis.	
<b>Module 2: Probability</b>	<b>10</b>
Review, Addition & Multiplication Rules, random Variables, Discrete distributions – Binomial & Poisson Distributions, Continuous Distribution – Uniform, Exponential, Gamma & normal Distributions, applications in transportation engineering problems.	
<b>Module - 3 : Statistical decisions</b>	<b>10</b>
hypothesis testing, significance levels – Tests concerning Mean, testing the equality of means of two populations, tests concerning the variance. Chi –square Test for goodness of fit Confidence Interval.	
<b>Module 4 : Time series analysis-</b>	<b>10</b>
Introduction –moving average- Problems	
<b>Module 5: Optimization technique and applications</b>	<b>10</b>
Graphical Method –Simplex Method-Big-M method-2 –Phase Simplex method- applications in transportation engineering problems. Use of Mathematical and statistical software packages

ENVIRONMENTAL IMPACT ASSESSMENT OF TRANSPORTATION PROJECTS [As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017) SEMESTER - II			
Subject Code	16CTE253	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Explain the concepts of environmental impact assessment and apply in the projects.</li> <li>• List and define various indicators such as terrestrial subsystems, Indicators aquatic subsystems, Socio-economic and able to Select various indicators for EIA studies.</li> <li>• Explain the impacts of transportation related components on environment</li> <li>• Explain and illustrate the methodologies for environmental impact assessment</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Introduction</b>			<b>10</b>
Environment and its interaction with human activities - Environmental imbalances - Attributes, Impacts, Indicators and Measurements - Concept of Environmental Impact Assessment (EIA), Environmental Impact Statement, Objectives of EIA, Advantages and Limitations of EIA			
<b>Module 2: Environmental Indicators</b>			<b>10</b>
Indicators for climate - Indicators for terrestrial subsystems - Indicators for aquatic subsystems - Selection of indicators - Socio-economic indicators - Basic information - Indicators for economy - Social indicators - Indicators for health and nutrition - Cultural indicators - Selection of indicators.			
<b>Module - 3 : Environmental Impact Assessment For Transportation Projects</b>			<b>10</b>
Basic Concepts, Objectives, Transportation Related Environmental Impacts – Vehicular Impacts – Safety & Capacity Impacts – Roadway Impacts – Construction Impacts, Environmental Impact Assessment – Environmental Impact Statement, Environment Audit, Typical case studies			
<b>Module 4 : Environmental Issues in Industrial Development</b>			<b>10</b>

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

On-site and Off-site impacts during various stages of industrial development, Long term climatic changes, Green house effect, Industrial effluents and their impact on natural cycle, Environmental impact of Highways, Mining and Energy development	
<b>Module 5: Methodologies for Carrying Environmental Impact Assessment</b>	<b>10</b>
Overview of Methodologies, Adhoc Checklist, Matrix, Network, Overlays, Benefit Cost Analysis, Choosing a Methodology, Review Criteria.

<b>OPTIMIZATION TECHNIQUES</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017)			
<b>SEMESTER - II</b>			
Subject Code	16CTE 254	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>To impart knowledge on different methods of optimization techniques, linear, non-linear, dynamic programming and use of network techniques.</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Introduction to Optimization</b>			<b>10</b>
Introduction - Historical developments - Engineering applications of Optimization - Statement of an Optimization problem - Classification of Optimization problems - Optimization Techniques. Optimization by calculus: Introduction - Unconstrained functions of a single variable - Problems involving simple constraints -			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Unconstrained functions of several variables – treatment of equality constraints - Extension to multiple equality constraints – Optimization with inequality constraints - The generalized Newton-Raphson method.	<b>10</b>
<b>Module 2: Linear Programming</b>	<b>10</b>
Introduction - Applications of linear programming - standard form of a linear programming problem - Geometry of linear programming problems - Definitions and theorems - Solution of a system of Linear simultaneous equations - Pivotal reduction of a general system of equations - Motivation of the Simplex Method - Simplex Algorithm - Two phases of the simplex method.	
<b>Module 3: Non-Linear Programming</b>	<b>10</b>
Introduction - Unimodal Function - Unrestricted search - Exhaustive search - Dichotomous search - Interval Halving method - Fibonacci method - Golden section method - Comparison of elimination methods - Unconstrained optimization techniques - Direct search methods - Random search methods - grid search method - Univariate method - Powell's method - Simplex method - Indirect search methods - Gradient of a function - Steepest descent method - Conjugate gradient - Newton's method.	
<b>Module 4: Dynamic Programming</b>	<b>10</b>
Introduction - Multistage decision processes - concept of sub-optimization and the principle of optimality - computational procedure in dynamic programming - example illustrating the Calculus method of solution - example illustrating the Tabular of solution - conversion of a final value problem into an initial value problem - continuous dynamic programming - Additional applications.	
<b>Module 5: Network Analysis</b>	<b>10</b>
Introduction - Elementary graph theory - Network variables and problem types - Minimum-cost route - Network capacity problems - Modification of the directional sense of the network, Application of Optimization Techniques.

Subject Code	16CTE26	IA Marks	25
Number of Lecture Hours/Week	03	Exam Marks	50
Total Number of Lecture Hours	12	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Illustrate the application of software for analyzing traffic survey data</li> <li>• Explain and illustrate generation of models for transportation planning</li> <li>• Explain arrival of economic cost of road projects</li> <li>• Introduce the methods of designing geometry of highways using computer software</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: ANALYSIS OF TRAFFIC SURVEYS</b>			<b>3</b>
<ol style="list-style-type: none"> <li>1. Classified volume count survey</li> <li>2. Moving car method</li> <li>3. Parking studies</li> <li>4. Origin-destination studies</li> <li>5. LOS study</li> </ol>			
<b>Module 2: TRANSPORTATION PLANNING</b>			<b>3</b>
<ol style="list-style-type: none"> <li>1. Trip generation modeling</li> <li>2. Mode choice/modal split problems</li> <li>3. Trip assignment problems</li> </ol>			
<b>Module - 3 : TRANSPORTATION ECONOMICS</b>			<b>3</b>
<ol style="list-style-type: none"> <li>1. Vehicle operating costs</li> <li>2. Toll pricing</li> </ol>			
<b>Module 4 : HIGHWAY GEOMETRY</b>			<b>3</b>
<ol style="list-style-type: none"> <li>1. Design of horizontal alignment, vertical alignment, generating cross section and design of intersections</li> </ol>

<b>PAVEMENT CONSTRUCTION TECHNOLOGY</b> [As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017) <b>SEMESTER – IV</b>			
Subject Code	16CTE41	IA Marks	20
Number of Lecture Hours/Week	04	Exam Marks	80
Total Number of Lecture Hours	50	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Explain concept of location surveys, procedure of preparing project report, documentation of contracts</li> <li>• Explain features, functioning and uses of different types of equipments used in road construction and construction specification for different layers of road</li> <li>• Provide information on specifications of construction of different types of granular sub base, base and surface course and construction of special pavement</li> <li>• Provide information on application of CPM and PERT in construction planning</li> <li>• Explain the maintenance activities for road and road furniture</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1:</b>			<b>10</b>
Importance of surveys and investigations, Guidelines for alignment and route location, Use of aerial photographs and remote sensing technology, Conventional ground survey techniques, Types of drawings, Estimates, Project reports, Project Cost Forecasting, Cost Optimization and Resources Planning, Tendering and Contracting, Laws of Contracts, Subcontracts, Potential Problems, Post Contract Problems, Documents, Conditions, Arbitration, Special Features of International Contracts. ; Human Resource Management, Resource Management and Inventory: Basic concepts, labor requirements and productivity.			
<b>Module 2:</b>			<b>10</b>
Road construction equipment – different types of ex cavators, graders, soil compactors / rollers,			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

pavers and other equipment for construction of different pavement layers – their uses and choice Problem on equipment usage charges; Pre-construction surveys and marking on ground - Specifications and steps for the construction of road formation in embankment and cut, construction steps for granular sub-base, quality control tests.	
<b>Module - 3 :</b>	<b>10</b>
Different types of granular base course – WMM, CRM, WBM; specifications, construction method and quality control tests. Different types of bituminous layers for binder and surface courses; their specifications (as per IRC and MORTH); construction method and quality control tests.	
<b>Module 4 :</b>	<b>10</b>
Different types of sub-base and base course for cement concrete (CC) pavement and construction method. Construction of cement concrete (PQC) pavements joints quality control during construction. Construction details of interlocking concrete block pavements	
<b>Module 5:</b>	<b>10</b>
Principle of construction planning, application of CPM and PERT, Problems, Road maintenance works – day to day and periodic maintenance works o f various components of road works and road furniture

<b>URBAN MASS TRANSPORT SYTEMS</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 -2017)			
SEMESTER – IV			
Subject Code	16CTE421	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Total Number of Lecture Hours	40	Exam Hours	03
<b>COURSE OBJECTIVES:</b> <ul style="list-style-type: none"> <li>• Explain different transit modes, routing management activities including demand analysis</li> <li>• Provide information on functioning, designing and scheduling of transit terminal design, fleet management, cost benefit analysis and bus transit operation</li> <li>• Provide information on loading and unloading transit platforms, traffic management techniques and IPT service improvements</li> <li>• Explain demand management techniques, intersection management techniques, planning for pedestrian, bicycle and parking management</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Transit Classifications</b>			<b>10</b>
Classes of Transit Modes, Technologies, Service Types, and routing Management Activities: Service, Finance, Marketing, Maintenance, Demand Analysis, Transit Subsidies.			
<b>Module 2: Terminals</b>			<b>10</b>
Design, Functional Aspects, and Scheduling of Transit Units. Efficiency and Effectiveness Indicators for Transit Planning: System, Subsystem, and Route Level Analyses, Staff Utilization, Fleet Utilization and Productivity, Passengers Carried, Revenue, Operating Costs, and Break-Even Load, Capacity Utilization, Financial Performance indicators, Cost-Benefit Analysis. Bus transit operations.			
<b>Module - 3 :</b>			<b>10</b>
Planning, routing and scheduling, Location of loading and unloading platforms and transit terminals. Transport System Management Actions: Traffic management techniques for improving vehicular flows, preferential treatment for high occupancy modes, promoting non auto or high occupancy use, and transit and intermediate public transport service improvements.			
<b>Module 4 :</b>			<b>10</b>
Demand management techniques for reduced traffic demand staggered hours, and vehicle restrictions; Intersection management techniques: signal progression, optimization and computer controls			
<b>Module 5:</b>			<b>10</b>

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Small area Management, Management of Bicycles, planning for pedestrians and planning for parking spaces
<p><b>TEXT BOOKS</b></p> <p>1. Vukan, R. and Vuchic, A. 'Urban Public Transport Systems and Technology'.          2. Morlok, E.K. 'Introduction to Transportation Engineering and Planning', McGraw Hill</p> <p><b>REFERENCES</b></p> <p>1. Transportation Systems Management: State of the Art, UMTA, US Dept. of Transport          2. <p><b>PAVEMENT EVALUATION AND MANAGEMENT</b>          [As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017)</p> <p style="text-align: center;"><b>SEMESTER – IV</b></p>			
Subject Code	16CTE422	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<p><b>COURSE OBJECTIVES:</b></p> <ul style="list-style-type: none"> <li>• Recall the importance of evaluation and strengthening of pavements</li> <li>• Introduce the various methods of structural and functional evaluation of rigid and flexible pavements</li> <li>• Discuss the need for pavement management and explain the techniques involved</li> <li>• Formulate the development and application of models for pavement management.</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Pavement Evaluation</b>			<b>10</b>
Introduction- Structural and functional requirements of flexible and rigid pavements; pavement distress; different types of failures, causes and remedial measures.			
<b>Module 2: Functional evaluation of pavements</b>			<b>10</b>
Evaluation of Surface Condition: Methods of evaluating pavement surface condition, PCI & PSI, measurement of skid resistance and unevenness by various methods, their applications			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

<b>Module - 3 : Structural evaluation of pavements</b>	<b>10</b>
Evaluation by non- destructive tests such as FWD, Benkelman Beam rebound deflection using BBD for flexible overlay design, Plate load test, wave propagation and other methods of load tests, evaluation by destructive test methods, and specimen testing.	
<b>Module 4 : Pavement management</b>	<b>10</b>
Historical Background -General nature and applicability of systems methodology, basic components of Pavement Management System, planning pavement investments. Design Strategies - Framework for pavement design – design objectives and constraints.	
<b>Module 5: Basic structural response models</b>	<b>10</b>
Characterization of physical design inputs – generating alternative pavement design – economic evaluation of alternative design – analysis of alternative design strategies – selection of optimal design strategy. Techniques for developing prediction models – AASHTO, CRRI and HDM models

<b>APPLICATIONS OF SOFT COMPUTING TECHNIQUES</b> [As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016-2017)			
SEMESTER - IV			
Subject Code	16CTE423	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

<ul style="list-style-type: none"> <li>• Understand the characteristics of Soft Computing Techniques.</li> <li>• Explain the concept of applying fuzzy logic and fuzzy reasoning for decision making.</li> <li>• To understand concept of Genetic Algorithm.</li> </ul>	
<b>Particulars</b>	<b>Hours</b>
<b>Module 1:</b>	<b>10</b>
Introduction, need for soft computing techniques, components of soft computing	
<b>Module 2:</b>	<b>10</b>
Artificial Neural Networks (ANN), types of ANN and learning algorithms, tasks performed by ANN Basic concepts of feed forward neural networks, perceptron learning rule, back propagation learning algorithm, application of feed forward ANN for function approximation and prediction, limitations of feed forward neural networks, applications of feed forward neural networks in Hydrology, Water Resources and Environmental Engineering	
<b>Module 3:</b>	<b>10</b>
Hebbian learning and Hopfield networks, pattern association, radial basis function networks, Kohonen networks and self organisation maps, applications of ANN in pattern classification.	
<b>Module 4:</b>	<b>10</b>
Information and uncertainty, Chance versus ambiguity, Classical sets and fuzzy sets, Logic and reasoning, Fuzzy set operations and fuzzy relations, Membership Functions, fuzzy numbers and fuzzy arithmetic.	
<b>Module 5:</b>	<b>10</b>
Fuzzy Systems, fuzzy relations, fuzzy inference systems, Decision Making with Fuzzy Information, Fuzzy Classification and Pattern Recognition, Neuro-Fuzzy Systems Evolutionary computing, concepts of genetic algorithm, components of genetic algorithm, Hybrid soft computing techniques, Applications in Civil Engineering	
<b>REFERENCE BOOKS:</b>

<b>RURAL ROADS</b>			
[As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 -2017)			
SEMESTER – IV			
Subject Code	16CTE424	IA Marks	20
Number of Lecture Hours/Week	03	Exam Marks	80
Total Number of Lecture Hours	40	Exam Hours	03
<b>COURSE OBJECTIVES:</b>			
<ul style="list-style-type: none"> <li>• Explain the concept and objective of providing low cost roads in developing country like India</li> <li>• Explain problems involved in the design of rural roads, preparation of rural road development plans and economic viability</li> <li>• Explain different types of surveys required for road alignment and road geometry with appropriate specifications</li> <li>• Introducing different materials used for construction and different types of construction procedures and equipment required for construction</li> <li>• Explain importance of road drainage, design of drainage and cross drainage structures with maintenance activities</li> </ul>			
<b>Particulars</b>			<b>Hours</b>
<b>Module 1: Introduction</b>			<b>10</b>
Concept Objective, Scope and coverage of low cost and rural roads. Explain significance of low cost roads for developing countries, with special reference to India			
<b>Module 2: Rural Road Planning and Investment</b>			<b>10</b>
Problems associated with planning of low volume rural roads in India .Rural road network planning-principles and methods. Socio-economic aspects in planning, preparation of rural road master plans and their evaluation: stage construction, planning and utilization of successive investments.			
<b>Module - 3 : Location Surveys and Geometrics Design</b>			<b>10</b>
Location surveys, geometric design standards for rural roads, special considerations for rural roads in hilly area.			
<b>Module 4 : Materials</b>			<b>10</b>
Stabilized soils, Design of soil-lime, soil-cement, soil-bitumen and soil-lime-fly ash mixes, Use of soft aggregates. Construction, Operation and Plants: Surveying and setting, excavation, hauling, Shaping and compaction, Stabilized soils-spreading, mixing and compaction. Appropriate technology, tools, plants and equipment for construction as per IRC practices.			
<b>Module 5: Road Drainage and Maintenance</b>			<b>10</b>

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM**  
**CHOICE BASED CREDIT SYSTEM (CBCS)**  
**SCHEME OF TEACHING AND EXAMINATION 2016-2017**

Drainage of road surface, pavement layers and cross drainage works. Various low cost drainage alternatives. Short term routine maintenance, long term maintenance, organizational and financial aspects of maintenance works.	
---	--
