

The “high” of competition is an addictive thing. It brings out different shades of our personality that we never knew existed. And honestly, it is exciting and intriguing. More than that, the competition also shapes us and makes us better at what we do. We humans have been competing for food, shelter, water, mates and other resources since the dawn of humanity.

**Various competitions/ sports/ events are conducted at the MBA department : Following are some of the glimpses of such activities:**
