### About KLS VDIT:

Karnatak Law Society (KLS), founded by eminent lawyers in 1939, has been rendering a yeoman service in the sphere of professional education in this part of the country. It has the distinction of running colleges in the fields of Law, Commerce, Engineering and Management Education. All its institutions have earned reputation as the lead institutions in Karnataka. Karnatak Law Society has established a number of institutions in Belagavi which have identity as Quality Educational Institutions. It started "Vishwanathrao Deshpande Institute of Technology" (VDIT) at Haliyal in 2004-05 by the initiation and support of Shri. R.V. Deshpande, Cabinet Minister, Government of Karnataka.

Within a short span, VDIT has developed excellent infrastructural facilities and an academic ambience to train the students to conquer the challenges posed by rapidly changing techno-economic scenario. The institution has an excellent, well qualified and experienced faculty. The Institute is located on a 28 acres campus, cradled by a picturesque landscape.

### About IEI, Dharwad :

Dharwad is a cultural, educational, business and industrial hub of North Karnataka. Recognizing the need for a common forum for engineers, Dharwad Local Centre of the Institution of Engineers (India) was established on 10-10-1965. Dharwad Local Centre is housed in its own premises on an extensive land in the heart of the city. The Local centre has been actively holding technical activities in various disciplines. It has also been holding Section 'A' Diploma Stream examinations

### About the Seminar :

The Role of Enterprise Portfolio Project Management in Civil Engineering is to reduce, counter the risks, organize and direct the resources so that the project is complete in time, within budgeted cost and with the fulfilment of functional or other design objectives. Workshop covers the 'Best Practice' principles for project execution and management in construction and other fields.

It explores the navigation, core functionality and demonstrates how to build a project from start to finish with widely used Project Management Software. This is a two-day Instructor Led Training (ILT) course facilitated by Professional Project Management experts with wide industrial experience. It includes a number of learner activities and formal assessment along with easy-to-use learner materials designed to support during and beyond training.

### Course Objectives :

- Provide an introduction to Enterprise Portfolio Project Management (EPPM) tool.
- Demonstrate how to build a project.
- Explore how to execute and optimize the project.
- Introduce and explore the visualize reporting tool.
- Equip the learner with a level of competency that enables one to use Project Management Software in the workplace.

### Topics Covered :

- Fundamentals of Project Management in Construction field and risk management.
- Planning Project: Create WBS, Activities and Tasks and Computation Time using Excel spread sheet and transferring the same to Project Management Software.
- Constructing Network Diagram (AON Diagram) and analyzing for Critical path, Critical activities and other non-Critical paths, Project duration and Floats.
- Understanding about splitting the activity, linking multiple activities, assigning constraints, merging multiple projects, creating baseline project.
- Sessions will be hands-on training on popular software which includes case studies from various fields of engineering.
