CIRCULAR

VTU FOSS group is organizing a webinar on "Using DNS as a layer of defense". DNS (Domain Name System) is the crucial and ubiquitous fabric of the Internet. While we rely on DNS to access websites, apps etc .on a daily basis, in a network, DNS can also be extremely valuable & effective defense layer in a multi-tiered security approach. This talk will give an introduction to DNS Firewalls and how it can be leveraged to stop threats, block ads in the network.

The key takeaways for the talk are:

1. Idea of a flat network & it's constraints
2. How malware(C2/Botnets, phishing URL's) leverage DNS
3. Using DNS we will be blocking ads, malware in the network

Interested faculty members and students can register using the following link:

https://zoom.us/webinar/register/6215958379075/WN_jEc-bl.kCREOpPfat-EIUYQ

The details are as follows:

Date: 31st July, 2020

Time: 04.00 p.m.

Duration: 90 minutes

The Principals of affiliated colleges are requested bring the contents of this circular to all the faculty members and students of their respective institution. **Registration is free but is limited to first 100 participants only.**
