4. VTU Consortium

4.1 Background of the establishment of VTU Consortium.

The member Secretary explained that the Hon'ble Supreme Court of India in its judgment and orders delivered on 25th April 2013 and ruled that colleges affiliated to a University do not come under the purview of the definition of "Technical Institution" as defined under Section 2(h) of the AICTE Act, 1987. Under the circumstances, it has become imperative for the universities and UGC to evolve a suitable methodology to ensure that existing technical/engineering colleges affiliated to universities do not dilute standards of technical education imparted by them.

From 2013-14 the AICTE-INDEST Consortia stopped its services to other institutions (self financed) and restricted its services only to MHRD funded institutions (IITs, NITs, ISSERs, IISc & others). Mean while AICTE could not proceed for notifying the Approval process of Handbook for the academic year 2014-15 in time.

In view of the above the VTU Affiliated Colleges requested the University to give directions regarding subscription of journals (print + online) and subsequently, some of the Executive Council members of VTU suggested [Principals] to form our own consortia.

The idea of the creation of the Networking Engineering College Libraries and Consortium was born at the "National Conference on Trends in Developing and Managing e-Resources in Libraries (TDMeRL-2012)" held at VTU, Belagavi in May 2012 based on the feedback given by the Librarians.

4.2   Expert Committee to form the VTU Consortium

Based on the above decision of the University, an Expert Committee consisting of LIS experts and Principal/Librarians of Engineering Colleges was constituted to discuss and decide about the modalities of formation of the VTU Consortium.

The Expert Committee compiled a Draft Policy Document for necessary consideration of the University. The same was approved by the Executive Council of VTU in its 107th meeting held on 7th September 2013.

Based on the approval of the EC, a communication about the formation of the VTU Consortium was sent to all the colleges and requested all the colleges to join this cooperative movement to help themselves. Accordingly, more than 110 colleges expressed their willingness to join the consortium and enrolled their membership by paying membership fee of Rs.10,000/- .

4.3   Initiatives of VTU Consortium in the year 2014

The member secretary explained that in 2014 VTU Consortium negotiated the subscription prices with original publishers and could achieve more than 60% of bargain from their list price. The same was communicated to all the colleges. However, the IEEE's IEL-Online could not be included in the consortium due to the non-negotiable stand of IEEE. The final package of negotiated e-journals and   e-books was approved by the Executive Council in its 110 meeting held on 20th January 2014.

4.4   Initiatives of VTU Consortium in the year 2015

The member secretary explained that in 2015 IEEE (IEL-Online Database) came with the concessional negotiation offer which was very well accepted by most of the colleges. Hence, it was included in the resources subscribed for the year 2015 along with other resources. The same was communicated to all the colleges. Accordingly 140 colleges became member by paying annual membership fee of Rs. 10,000/- .

4.5 Students Fee Model

Then the VTU Consortium committee decided to implement the Student Fees Model similar to the HALINET Consortium (RGHSU). Accordingly the Committee recommended to fix the fees to students UG Students-500/-, PG Students-1000/- and Research Scholars 2000/- the proposal was placed before the Executive Council of the VTU which was approved in its 117th

meeting held on 21st February 2015. This fee model was initiated with the intention to fill the gap between Resource Rich Colleges; Resource Poor Colleges and Resource Nil Colleges.

NAAC/NBA are also appreciated while inspecting the VTU affiliated colleges for getting rich resource with best negotiated price specially IEL Online Database.

IEEE has made our negotiated price as brand for other consortia (including AICTE and INFLIBNET's E-Shodhsindhu) in India .

JNTU (Kakinada), KTU (Kerala), MGR University (TN), GTU (Gujarat), SU (Kolhapur) and some other Universities are seeking the guideline to form the similar kind of Consortia.

4.6 Initiatives of VTU Consortium in the year 2016:

The member secretary brought to the notice of the Hon'ble Vice Chancellor and Registrar, the recommendations made by the Steering Committee for subscribing the following e-Resources for the year 2016:

4.7 Aims and Objectives of VTU Consortium:

- Provide access to the high-quality and scholarly electronic resources to the member institutions evolving competitive pricing models at most favorable terms and conditions;
- Promote rapid and efficient access to scholarly content to the users;
- Promote interaction and inter-library cooperation amongst the participating institutions;
- Impart training to the students, research scholars, faculty members and librarians of the institutions to use electronic resources efficiently;
- Evaluate the usage of the subscribed resources from time to time and to identify new resources that are required to be subscribed under the programme;

- Bring qualitative change in teaching, learning and research with an aim to meet the ever growing challenges of globalization of higher education;
- Increase the research productivity of the institutions both in terms of quality and quantity of publications; and
- Extend the benefit of Consortium to Associate Members.

4.8 Benefits

The consortia-based subscription to e-resources is a viable solution for increasing the access to electronic resources across Technical Institutions at competitive rates of subscription. Major benefits of The Consortium are as follows:

- VTU Consortium acts as a single-window service for Technical Institutions with their diverse research and academic interests;
- VTU Consortium, with its collective strength of participating institutions, attracts competitive rates of subscription, benefit of cap on the annual increase with most favorable terms of agreement for a wider range of e-resources;
- Users would get access to material previously not subscribed to, including back files;
- VTU Consortium is expected to trigger remarkable increase in sharing of both print and electronic resources amongst participating library;
- VTU Consortium has been opened-up for all other Technical Institutions Polytechnics through its "Associate Membership Programme". Private institutions and other institutions can join the VTU Consortium and get the benefit of not only competitive rates of subscription but also the favourable terms and conditions;
- Since the subscribed resources are accessible online in electronic format, the beneficiary institutions have less pressure on space requirement for storing and managing print-based library resources. Moreover, all problems associated with print media such as their wear and tear, location, shelving, binding, organizing, etc. are not an issue for electronic resources; and
- The research productivity of beneficiary institutions is expected to improve with increased access to international databases and full-text resources.

VTU Consortium is considering a discovery solution for the AICTE mandatory requirement of e-resources for member as well as for the other member institutions in Karnataka, (ii) establishment of state coalition of all library consortia to have a common e-resource policy for Karnataka, (iii) frame an archival policy of the e-resources of consortia as well as the individual library of the state, (iv) negotiate the eBooks/journals for the member Institutions through consortia, (v) setting-up mirror servers, local hosting and (vi) to obtain national licenses for important e-resources with access spread out to as many educational institutions as required. Some of the issues like budget management, catalogs – Next Gen, catalogs union, digital initiatives, licensing - new, licensing renegotiations, inter library loan, open access, print being collections -cooperative collection development, print collections- shared storage, research projects, training, e-book purchase and other priorities are under constant discussion among the member institutes and other consortia.

Today the Libraries are crowded with huge amount of print and non print information. It has become a challenge to the professionals about efficient dissemination of the information with the traditional framework of Librarianship "Right Information to Right User at Right Time". Further, procuring the huge peer-received information is also very expensive to an individual institutional library and without exhaustively information supplied to the users will be partial and will not

satisfactory. Hence, equipping every Library with exhaustive information at a less cost is need of the day.

Here comes the role of Consortia which enable each libraries flooded with huge and exhaustive information. The Consortium Concept will also enable the remote individual libraries with information all the organizing and repackaging in ready to use from effectively through their gateway portals.

Hence, the end user will also be individually efficient enough to access the desired information through the consortium portals or remote access facilities extended by the consortia.

India stands seventh place in the world in Science and Technology publications contributing only 3.5% of the total international output and citation share is just 1.8% China stands second place contributing 15% of the total international output and its citation share is 7.3%. With this background enables us to understand the need for increasing the research output of India. For this we need to equip our Scientists and Researchers with exhaustive information about the state-of-the-Art growth in their respective subject areas.

This can only be possible when all libraries are rich enough to procure all the resources or to form a Consortium to enable the Scientists and Researchers to access the information and produce quality research output in the form of articles, patents and books etc. Hence it is essential to promote the concept of forming Consortia at every regional level for every discipline.
