

VISVESVARAYA TECHNOLOGICAL UNIVERSITY

“Jnana Sangama” Belagavi-18, Karnataka

Department of Electronics and Communication Engineering

BOOTCAMP ON HARDWARE SECURITY

NOVEMBER 10th to 14th -2025

About VTU:

VTU is one of the largest Technological Universities in India with 24 years of Tradition of excellence in Engineering & Technical Education, Research and Innovations. It came into existence in the year 1998 to cater the needs of Indian industries for trained technical manpower with practical experience and sound theoretical knowledge.

Bootcamp Focuses On:

This bootcamp introduces students to the critical field of hardware security, emphasizing common threats and vulnerabilities in modern devices. It covers security challenges in embedded systems, and explores strategies for ensuring secure hardware systems.

Program Objectives:

- Understand the importance of hardware security
- Learn about common hardware threats and vulnerabilities
- Study security in embedded systems.
- Discuss Solutions For Ensuring Secure Hardware Systems
