Department of Electronics & Communication Engineering

FACULTY UPDATION PROGRAM ON CHALLENGES, TRENDS AND INNOVATIONS IN HARDWARE SECURITY

JANUARY 5th to 9th -2026

About VTU:

VTU is one of the largest Technological Universities in India with Tradition of excellence in Engineering & Technical Education, Research and Innovations. It came into existence in the year 1998 to cater the needs of Indian industries for trained technical manpower with practical experience and sound theoretical knowledge.

FUP Focuses on:

This FUP promotes academic awareness of secure hardware design, exposing participants to current research trends and evolving industry practices. The program emphasizes understanding emerging threats and vulnerabilities in modern hardware systems, strengthening foundational knowledge. It equips participants with insights to implement robust hardware security strategies.

Program Objectives:

- To promote academic awareness of secure hardware design principles and best practices.
- To expose current research trends and industry practices in Hardware Security.
- To familiarize with emerging threats and vulnerabilities in modern hardware systems.

**REGISTER
NOW**

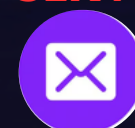

Who Can Apply: Faculty Members and Research Scholars

Registration Link: <https://faas.isea.app/formview/FDP20251210VCWW>

REGISTRATION IS BASED ON FIRST COME FIRST SERVE BASIS
